OUR CANADIAN TROOPS IN SOUTH

The report of Colonel Otter in regard to the condition of the first contingent. which is dated July 6th, is rather melancholy reading. Dr. Watt, in one of his rable hymns, says: "The morent that our lives begin, we all begin to die," and that is certainly the case of a regiment of soldiers. The first contingent started from Canada 1.039 strong and 114 men were afterwards added, making a total of 1,153. At the date of Colonel Otter's report only 443 of these men were fit for duty, 38 had been killed in action, 25 had died of disease and 113 had been sent to England invalided; 283 were sick at the various rest camps and 81 were at the convalescence camp at Cape Town. Probably the Canadian troops have not suffered more from sickness than the other regiments in South Africa, but the list of convalescents shows how severe a strain war, and especially war in a feverupon a body of men. Reading of the conmuch Lord Roberts must have been hampered in his campaign by the reduction of his force by wounds and sickness. Although he has or has had 200,000 men in South Africa, if the losses from various causes were as heavy as they have been in the Canadian regiment, there would not be more than 80,000 men in line available
