OKATKA PAINT, OKATKA WHITEWASH, PASTE, LEATHER HORSE, and all tions of PAINT WHITEWASH, and SCRUB BRUSHES, FACTORY and OFFICE, Union corner Carmarthen Street,

> ST. JOHN, N. B. PROSPECTUS

SPRING HILL MINING COMPANY,

INCORPORATED UNDER LAWS OF NOVA SCOTIA, 1870, C. 72. Capital \$400,000, with power to increase to \$1,000,000. SHARES \$50.

LIABILITY OF SHAREHOLDERS LIMITED TO THE AMOUNT REMAINING UNPAID ON THEIR STOCK.

2,600 Shares are offered by public subscription. \$5 per share to be paid on application; \$15 per share on allotment, 1st July, 1872; \$15 per share on 1st September, 1872, and \$15 on 1st November, 1872; or the whole may be paid on allotment, with deduction of interest at 6 per cent. per annum, on all payments in anticipation of the date when they become due.

DIRECTORS, &c.

Hon, ALEXANDER MACFARLANE, Senator, Wallace, Nova-Sectia, President. How. ROBERT BARRY DICKEY, Senator, Amberst, N. S. CHARLES H. M. BLACK, Esq., Merchant, Halifax, N. S. LT. COL. CHARLES J. STEWART, Amherst, N. S. ALEXANDER ROBB, Esq., Proprietor Amherst Iron Foundry, Amherst, N. S. TREASURER-JAMES S. HICKMAN, Esq., J. S. Hickman & Co., Merchants, Amhers', N. S. SECRETARY-WM. J. MOFFAT, Esq., Barrister, Amherst, N. S. Bankers-Bank of Nova Scotia, Amherst Branch; and Bank of New Brunswick, St. John, N. B. OFFICE-Mr. W. J. MOFFATS Office, Amherst, N. S.

The Company have acquired, by purchase, three leases from Government of Nova Scotia to Hon Alex. Macfarlane, of one square mile each, of the richest coal deposits in Canada, at Spring Hill, Cumberland County, Nova Scotia, renewable until August, 1926. Royalty 10 cents por ton of 2.240 lbs.

Five seams and upwards, of varying thickness from 2½ to 13 feet, are known to exist within these areas, which comprehend (exclusive of a portion of the General Mining Association reserve) nearly all the coal yet discovered in this well known district. Of these, one, known as the 11 feet seam, has been opened, and several hundred tons raised by a slope sunk only 25 feet from the surface, and preserving a thickness of 10 feet for two-thirds of that distance. The slope has lately been carried down to the depth of 95 feet, exhibiting a marked improvement in the quality of the coal, described by Sir Wm. Logan, from specimens near the outcrop, as "an excellent coal, superior to any of this continent yet known." A moderate estimate of the quantity would give as the yield from this seam alone, half a million tons annually during the lease. The larger seam has been exposed by a trial pit within the areas; the smallest of 2½ feet, is believed to contain a valuable gas coal, and it is a fair geological inference that all these beds of coal will be found in their proper position. Thus several distinct colleries may be leased to individuals or companies.

A breach railway of 34 miles has been surveyed, and steps are being taken for its

beds of coal will be found in their proper position. Thus several distinct collectes may be leased to individuals or companies.

A branch railway of 3½ miles has been surveyed, and steps are being taken for its construction to connect the property by a down grade with the Intercolonial Railway, at a point 21 miles from the head of the Bay Fundy and contemplated Bay Verte Canal, and 13 miles from a shipping place at the mouth of Maccan River, half a mile from the Intercolonial, where vessels drawing 13 feet of water may load. Until the opening of the Intercolonial, between Truro and Amherst, next autumn, the coal will be hauled 4 miles to Plack Figure 18 and 19 miles from the strength of the coal will be hauled 4 miles to Plack Figure 18 miles from the coal will be hauled 4 miles to Plack Figure 18 miles from the coal will be hauled 4 miles to Plack Figure 18 miles from the coal will be hauled 4 miles from the coal will be from the coal

paid; 90 pacanges TEA, in bond and duty paid; 35 obls Walnuts, Castanas and Filberts; 2 cases Nixey's LEAD; 2 " and 10 kegs Colman's Mustard; 2 " Black Lend; 12 bbls Pickles; 1 bbl Cream Tartar; 1 bbl Borax; 1 " Rlue Vitriol; 1 cask Allum; 5 casks Table S.lt, in bottles; 3 cases Sardines; 15 mats fresh Dates; 4 " new figs; 12 bags Pepper; 10 boxes Saltana Raisins; 50 sacks Rice; 40 kcgs Ri-Carb Sods; 15 bbls Washing Soda; 10 bbls Currarts; 1 bbl Sulpbur.
With a good assortment of Grocery Goods in stock, in Suices, Ginger, Sugars, Mo'assea, Parafine Oil, Flour, Meal, Smoked Meats, Ruisins; a good assortment of anned Goods and other varieties; a choice assortment of CONFE TION.
ERY hourly expected, all of which will be sold cheap for satisfactory payments, by W. C. TREAD WELL, may 16 miles to Black River Station.

From the nearness of the outcrop to the surface, and the seams lying on high and descending ground, securing easy drainage, it is considered that these seams may be most economically worked.

The freight of a ton from the head of Bay Fundy to Boston or New York is about 75 cents less than from Pictou or Sydney—of itself a good profit, while the difference to

75 cents less than from Pictou or Sydney—of itself a good pront, while she diherence to St. John is fully \$1 00.

The Spring Hill coal is well adapted for house, steam and smelting purposes. Situated within 37 miles by rail of the lodes of brown hematite and micaceous iron ore of the richest quality, known as the Acadia iron ore, of Londonderry, it is difficult to assign limits to the quantity of ore likely to be taken to Spring Hill, for smelting by a sign limits to the quantity of ore likely to be taken to Spring Hill, for smelting by a sign limits to the quantity of ore likely to be taken to Spring Hill, for smelting by a sign limits to the quantity of ore likely to be taken to Spring Hill, for smelting by a sign limits to the Quantity of ore likely to be taken to Spring Hill, for smelting by a sign limits to the Quantity of the Intercolonial between Truro and Amherst is now being ballasted with engines driven by Spring Hill coal. It is understood that the line between Truro and Newcastle, if not the whole line to St. John, a distance of 280, miles will shortly be worked in the same way, and the local demand between these points, already large, is steadily increasing.

vessels bringing flour from the St. Lawrence to St. John, Yarmouth, and other lower ports, through the Bay Verte Canal, when completed, may have return cargoes of coal to Quebec, Montreal or Toronto.

From all these sources of traffic, in addition to the Western part of Nova Scotia, the New England ports and New York, it is assumed that an unlimited market will be afforded.

Additional means of shipment will be afforded by the contemplated railway to Parrsboro—a port open at least ten to eleven months in the year—for which the Nova Scotia Legislature have provided large subventions.

The estimated cost per ton for raising, handling, and putting on board ship, say at mouth of Maccan river, is about as follows:

If Pictou and Sydney coal can be shipped to Boston and New York at paying prices. it cannot fail to be highly remunerative to send a better article from Spring Hill, with an advantage of 75 cents in freight. The local traffic would yield a high rate of nt. Taking the low average of only 80 cents per ton, inclusive of repairs of machinery Taking the low average of only 80 cents per ton, inclusive of repairs of machinery, &c., and assuming only 100 000 tons as the annual production at first, we have a gain of 20 per cent. on the capital, which might be much augmented by the rent of other seams, as suggested. From the exceptionally high character of this coal, and the facilities for raising it cheaply, this quantity, it is confidently believed, might ere long be doubled or trebled, and a large rate of profit secured even with considerable increase of capital.

TESTIMONIALS,

Extracts from Reports of Messrs. Woodhouse and Jeffcock, Mining Engineers, London and Derby, G. B., (January 2, 1866) The Coal Field which we have carefully examined, and which is the subject of this Report, is situate in the county of Camberland, in the province of Nova Scotia. It is generally described as the "Springhill' Coal Field, but in reality it is a part of the great Camberland Coal Field.

The first or upper seam we found to be a bed of remarkably good coal presenting a very

SAINT JOHN, N. B., THURSDAY EVENING, JULY 4, 1872.

Report of John Rutherford, Esq., M. E., late Inspector of Mit

Professor Henry Y Hind, M. A., in his recent Report of Springhill Coal Field, thus sums up "Thickness of large Springhill seams 13 feet and 10 feet 3 inches. Quality of Springhill seams of the very first class. Distance of these from Parrsboro by rail, 26 miles. Knowa outcrop of Springhill main seam, 11 feet, on which operations could be immediately commenced, about 2 miles.

miles.

"The main seam, no what is supposed to be the main seam, has been traced for a distance exceeding one mile and a half in a northerly direction, on the Macfarlane areas."

In Professor Selywyn's, F. G. S., Report laid before Parliament, Session 1872, he thus refers to Mr. Scott Barlow's operations at Springhill: "The evidence, so far as it goes, appears to show that in a distance of about eight hundred yards, horizontal measurement, agrees the strike of the measures, there are eight sessms of workable thickness, as under, in descending order. No. 1, 13 ft. 6 in.; No. 2, 6 ft. 10, 3, ? ft. 4 in.; No. 4, 12 ft. 3 in.; No. 5, 2 ft. 6 in.; No. 6, a crop, thickness uncertain; No. 7, 4 ft., shaly coal; No. 8, 2 ft.; Total, 42 ft. 7 in."

APPLICATIONS FOR SHARES must be made in the annexed form, and forwarded to the Bankers, or to the Secretary at the Company's Office, where the By-Laws may
