

QUEBEC, 23 MARCH, 1811.

SIRS,

DURING the Winter Months this Market seldom offers any brisk demand for Imported Goods; the chief Sales, more particularly in West India Produce, being effected, before the close of the communication by water with the interior. Sales, however, this Season, have been and continue unusually dull, since our last advices no material change has taken place, our quotations in consequence do not much vary from the prices then stated; but, so little is doing, that the present may be considered merely unusual.

We have already noticed that the quantity of RUMS imported last Season, exceeded that of any year antecedent; better prices, also, have in general been obtained, than under such heavy supplies could reasonably have been expected—and the consumption such, that the stocks now remaining in first hands in Quebec, do not together amount to one hundred Puncheons yet; the quantity in sale, appears fully to meet the present demand.—The failure of our Wheat Crop, and the scarcity of Cash, incline us to think that the Sale of Rum in this Country during the ensuing Season, will not equal that of the past year, as to quantity, and we fear prices may prove less favorable; this opinion we ground upon former experience.

No demand at present for MUSCO'S SUGARS, or for COFFEE; Sales of the latter are always very limited, except when at low prices. Of MADEIRA and all other WINES (Spanish Red excepted) the Import of last Season fell short of that for 1809, yet the demand has been very inconsiderable, and a great proportion of what was received remains still in the Market; a parcel of about 20 pipes Madeira, of good quality, was lately sold by Auction at the miserable rate of £10 to £15 Currency per Pipe, and of these 3 or 4 Casks only exceeded £4.5.

We regret not to have any thing more favorable to add on the subject of WHEAT and FLOUR, than communicated by our former advices—nor can we yet presume to say to what extent our supplies may prove from Upper Canada, where they had fortunately an abundant harvest; or, whether through these means we may be enabled to spare any Flour for exportation; we in consequence consider it to be our duty to state to our Correspondents, the opinion we hold, that it would prove very hazardous to trust to Quebec for their supplies either of Wheat, Flour or Biscuit, for the ensuing Season.

OF SALTED PROVISIONS we shall have great plenty

Dry and Pickled FISH are generally to be procured here, but when Shipments are desired of these Articles, it would be advantageous to the interested that orders should be given for the purchase six or eight weeks before the intended time of Shipment, which from our local situation, becomes necessary, fully to meet the views of our West India friends, by allowing time to procure from the Out Posts what could not readily be had in Quebec.

There is very little at present doing in the POT ASH Market; a few lots occasionally are taken off, our quotations: there are now about 5,500 Barrels in the Inspection Stores at Montreal.

Contracts have been made for OAK and PINE TIMBER, to be delivered at Quebec in July and August next, the former at 1s. 6d. a ls. 8d. per Cubic Foot, the latter at 6d. for White, and 1s. 1s. 1d. per cubic foot for Red—but we have not heard of any agreement being entered into for STAVES.—On Lumber Contracts heavy advances are always required, of course much risk and frequent loss attend them.

We take the liberty to remark that all Letters intended for Canada, and forwarded through the United States, (those only excepted which come in the regular Mail by the Packets) must be put under cover to some Correspondent there, as the inland postage to the frontiers must be paid, otherwise such Letters would not be sent on.

We pray your reference to the annexed Prices Current and List of Duties, also to the subjoined Statement of the Imports and Exports for the years 1808, 9 and 10, by the River St. Lawrence, the former are confined to such Goods only as pay Duty, no account being taken at the Custom House of those entered free.—We give also a list of the chief Imports to this Province from the U. S. by the inland communication via St. John, for the same years.

We beg leave to renew our tender of best services to you and your friends, as well in behalf of our Establishment at Montreal, under the firm of IRVINE, LESLIE & Co. as of

SIRS,

Your most obedient, and

Very humble Servants,

IRVINE, MACNAUGHT & Co.

PRICES CURRENT.—EXPORTS.
