

DR. WILSON'S PULMONARY CHERRY BALSAM

is the most reliable remedy known to man, and has been the means of saving many valuable lives since its introduction to the people of Canada.

Throat and lung diseases it can have no equal, being invaluable in all those specially mentioned below.

Colds, which are usually thought and made so little of, it is imperatively necessary to take in time, especially should there be a tendency in the patient's family towards consumption.

The proper remedy for all colds, either in the head, or permeating the system, is a prompt administration of *Dr. Wilson's Pulmonary Cherry Balsam*.

Coughs, the outgrowth of colds, which are accompanied with difficulty in breathing, etc., must be at once looked to.

Every hour of delay is important, serving as it does, to strengthen the hold of the disease on the system, rendering the patient the less susceptible to the curative properties of medicines.

To-day's irritating cough, which is but a trifling annoyance, may to-morrow become bronchitis, and must be immediately relieved by *Dr. Wilson's Pulmonary Cherry Balsam*.

No fool-hardiness is greater than that exhibited by persons who expect such coughs or colds to disappear of themselves, without assistance.

Nature is feeble, and must be assisted at such times, and it is the sufferer's imperative duty to at once seek prompt relief by the use of *Dr. Wilson's Pulmonary Cherry Balsam*.

Nothing is so effectual in allaying a cough as this specific, which soothes the irritation, and exerts an influence that destroys disease and restores the sufferer.

Sore throat is another most dangerous affection, which commencing simply by a slight sore feeling, may run quickly through all the more painful stages, until becoming ulcerated, the patient succumbs to the disease.

Take such in time therefore. Relieve the inflammation immediately. Get the most potent remedy that is invented and effect a cure. Such a remedy is *Dr. Wilson's Pulmonary Cherry Balsam*.

Hoarseness and loss of voice frequently afflicts those whose occupation leads them to the use of the vocal organs at all times. Amongst such may be included Clergymen, Public Speakers, Members of Parliament, Legal Gentlemen, Vocalists, Actors, Auctioneers, etc. Benefit will be at once experienced upon using *Dr. Wilson's Pulmonary Cherry Balsam*.

Quinsy is another form of ulcerated sore throat, with inflammation and enlargement of the tonsils. Great headache, thirst and considerable fever, are its accompaniments. The disease is a dangerous one if not immediately checked by doses of *Dr. Wilson's Pulmonary Cherry Balsam*.

Bronchitis is a most dangerous inflammatory disease, often the result of a simple cold produced by exposure, especially in wet or cold weather. It begins in a rough feeling along the windpipe, and the patient tries unsuccessfully to clear the throat. A dry cough succeeds, then great hoarseness, with oppression over the chest, trouble in breathing, accompanied by acute pains, and the expectoration of a thick mucous matter, white at first, but afterwards of a yellowish, greenish, color, sometimes tinged with blood. Expectoration becomes very exhaustive. Feverishness and sometimes cold sweats are present, and Bronchitis frequently be-

comes consumption, unless checked. *Dr. Wilson's Pulmonary Cherry Balsam* checks, relieves and cures Bronchitis.

When recovering from Bronchitis, the patient, together with the *Pulmonary Cherry Balsam*, is advised to recuperate his or her system with *Dr. Wilson's Tonic and Sarsaparillian Elixir*. The bowels should also be kept properly open with *Dr. Wilson's Family Anti-Bilious and Preserving Pills*.

Asthma is an obstinate disease, generally much worse during the night season, when it occasions not only loss of sleep, but restlessness, coughing and threatened suffocation. The patient is exhausted and greatly distressed, owing to the bronchial tubes becoming contracted and congested, respiration being impeded and almost suspended. Obstinate nor not, *Dr. Wilson's Pulmonary Cherry Balsam* is the medicine that will effect a cure, if taken both during and after the fits.

Influenza sometimes affects a whole community in an epidemic form. It has for symptoms, hoarseness, continuous sneezing, the throat is sore, as well as the stomach and lungs, there are often chills and fever as well. The discharges from the nose are continuous, and the eyes run. There is usually a cough and difficulty in expectorating. As neither a single patient nor a whole community can tell when influenza—which if not checked, may degenerate into consumption,—is likely to make its appearance, and as the best known remedy is *Dr. Wilson's Pulmonary Cherry Balsam*, parties should never be without a bottle of this famous specific in the house.

Hay fever is a summer complaint, which often attacks weakly people during hot weather. It usually begins from a cold, and is accompanied by difficulty in breathing, while hot weather, dust, the smell of flowers, hay, fruit, the pollen of plants, etc., aggravate to an unbearable degree the patient. Nothing alleviates this disease so thoroughly and quickly as *Dr. Wilson's Pulmonary Cherry Balsam*.

Diphtheria, a virulently contagious disease, needs immediate action if it is to be overcome. Frequent doses of *Dr. Wilson's Pulmonary Cherry Balsam* should be immediately given the patient, even before the medical man arrives, who will probably order a continuance of the remedy.

Great Debility follows an attack of Diphtheria, and as the patient's strength has of necessity to be restored, nothing will eradicate the remains of the disease, and restore the enfeebled vitality equal to *Dr. Wilson's Tonic and Sarsaparillian Elixir*.

Congestion of the lungs begins with a sudden cold, brought on by exposure to cold or damp. The lungs are choked up with blood, there is great difficulty in breathing, cough, pain in the side, expectorations and feverishness, the heart's action is irregular, skin hot, the bowels irregular in their action, being sometimes costive, sometimes loose. On such symptoms making their appearance the only thing to do is to make immediate use of *Dr. Wilson's Pulmonary Cherry Balsam*. It is almost infallible.

Catarrh is a disease which is apparently on the increase, owing to people, doubtless, being partially unacquainted with the precious boon offered them in *Dr. Wilson's Pulmonary Cherry Balsam*. Attacking the glands and membranes of the head, it, in time, becomes a chronic complaint. Then woe to the sufferer! The very frontal bones of the skull decay, the cartilages of the nose are eaten away, the breath stinks, the brain itself is affected and the hearing, memory, sight and taste, are destroyed.

It must be checked at once, if it is to be easily cured, and not left to degenerate into con-
