## The Feeders' Corner

The Feeders' Corner is for the use of our subscribers. Any interested are invited to ask questions or send stamps of interest. All questions will receive prompt attention.

## Do Oats Affect the Flavor of Milk?

The effect of various feeds on the flavor of milk has long been a disputed point. Many dairymen hold that crushed oats result in milk of very desirable flavor, while others are equally certain that corn meal produces the best flavored milk. To get accurate information, the subject the Bureau of Animal Industry of the United States Department of Agriculture used six cows for an experiment. Three were fed a grain ration of corn meal, bran, and cottonseed meal. The other three were fed a grain mixture of five parts crushed oats and one part cottonseed meal.

A number of samples of milk from the cows fed these rations were submitted to various persons in the dairy division and they were asked to indicate their preference. In all 50 opinions were passed on various samples. Of these, 16 showed a preference for the milk from cows fed on crushed oats, 23 preferred that from the bran and corn ration, while nine expressed no choice. The results show that in these rations, not only was there no marked difference in favor of the crushed oats as a feed to improve flavor, but, if anything, the ration containing bran and corn was more successful in producing a fine-flavored milk.

## Regularity of Feeding

R. R. Hamilton, Wentworth Co., Ont.

I have somewhat unusual views on the subject of feeding. I have been reading all of the articles appearing on the subject, and in these the points most emphasized are the quantity and quality of green foods, their relative proportions, and the most desirable kinds of roughage, and so forth. The one factor that I believe in feeding ahead of all others is, regularity.

Have you ever heard it said of a man that he could do a great amount of work in a day and keep it up year after year? Often the wonderful point has been that these men who are such workers are not men of tremendous physical strength. How did they do it? Invariably you will find it is a matter of regular habits. They never subject themselves to unusual hours or to unusual strain of work. It is moderate, everyday accomplishments that carry them ahead.

Let me draw an analogy with the cow. I know that the parallel is not exactly a similar one. The cow must each week produce a certain amount of milk that necessarily requires a certain amount of feed to make. After we have accounted for the amount of feed for milk production, however, the analogy is similar. The cow that is fed regularly right to the tick of the clock without any sudden change of feed, will keep in better condition and do better work for her owner than the cow fed much more extensively, but without regularity. And in the long run does not profitable production depend largely on the condition of the cow?

I would like to see a clock kept in every stable and milking and feeding kept right up to the minute. With cows, as with men, regularity is a priceless boon.

## Use Coal Oil—12c. For 10 Hours

This is the cost for Coal Oil per horse power to run this engine, figuring the price at 16c. a gallon. Don't let the high price of gasoline prevent you from having cheap, safe and dependable farm power.

# ELLIS ENGINES

Will develop more power on a gallon of the cheapest coal oil than other engines will do on a gallon of high-priced gasoline; no danger of fire or explosion. Simplest engine on the market, only three working parts; starts without cranking; runs either way; no excessive weight; guaranteed 10 years and will last a life-time. Anyone can run it; very complete instructions furnished.

## Make Us Prove It

Don't let any competitor or agent tell you that Ellis Engines will do on a gallon of high-priced gasoline; no danger of fire or explosion. Simplest engine on the market, only three working parts; starts without cranking; runs either way; no excessive weight; guaranteed 10 years and will last a life-time. Anyone can run it; very complete instructions furnished.

Write to-day for catalogue and opinions of users who saw them run at Toronto Exhibition. Let us prove it to you under actual working conditions on your own place before you buy. We'll ship an engine from Windsor, Ontario, on 30 days' trial, freight prepaid, so you will have neither duty nor freight to pay. If we don't prove our claims, send the engine back. Write to-day for catalogue and opinions of users in all parts of Canada.

ELLIS ENGINE CO., 90 Mullett Street, Detroit, Mich.

## IMPROVED CRUMB'S WARRIOR STANCHION

The standard of stanchion and extension for a quarter of a century. Mr. Gov. Mead of Florida's "Military Review" has been very much impressed with the practical application of Warrior stanchions.

Write for booklet and specifications of one of the simplest and most useful pieces of equipment in any stable. WALLACE H. CRUMB, 20, Forest Hill, Canada, U.S.A. Canadian agent, 100, Queen Street, Toronto, Ont. All correspondence should be addressed to the latter office. None in inquiry if you prefer booklet in French or English.

## How Good Roads will benefit You.

THEY BENEFIT THE FARMER, because they increase the value of his farm; enable him to raise more profitable crops; his cost of hauling will be low; he can reach markets when prices are best; his children can get to school every day in the year, and he will have more social life and better conditions generally.

THEY BENEFIT THE CONSUMER, because they reduce the cost of living in proportion to what the farmer saves, and by bringing new industries to the community, enable a larger proportionate amount to be paid out in wages, and with increased population, more amusements and better stores.

Public roads are commercial feeders of the city, and every improvement of these roads means a greater prosperity through increased agricultural production and greater stimulus to all industries.

## Economical Good Roads

Concrete roads are best from the start and cheapest in the end. They are free from ruts, mud and dust. They give good footing to horses and easier traction to every class of vehicle, but most important is the fact that they require practically no expenditure for upkeep.

Complete information of concrete road construction is yours for the asking, without cost or obligation.
