THE

I Would

USED TO DREAD  
the old system  
There was a  
way to make real  
good-sized cocks  
been exploded to  
experience has pr  
up the self-binde  
and we all know  
consider one just  
have come to thi  
hay making machi

I was always v  
good hay; I am  
that, taking it for  
hay by a rapid pr  
old slow process  
labor is one of t  
with which we h  
present crisis. Mo  
chinery is the onl  
er farming opera

One of the great  
chinery is the rap  
The weather may  
but with the mach  
hay cured and in  
before we could g  
the old system. I  
would have to wa  
before it could be d  
cases it would fra  
over and allowed  
ing in.

What I consider  
first a wide-cut  
leaves the grass a  
short-cutter bar,  
much with the div  
always got a sh  
a combined side d  
der. This will m  
windrows and by  
the bedding. This  
able for rapid hay-  
er. The old-fashi  
also valuable for t  
This should be a tv  
can change from o  
out changing horse  
any time.

The next machin  
which is certainly  
labor-saver. One  
load if necessary.  
come accustomed t  
Of course if you h  
drive the team, it i  
rapid work there al  
the load and a driv  
vantage of the sid  
that it sets the hay  
the dry side in and  
side out, thus givi  
chance to dry it o

I consider the hay  
in when two-thirds  
either third is absor  
and it will never sp  
which my father p  
ever since I started  
never had spoiled  
I followed this rule  
visible to sprinkle  
hay when a little da
