CARTER & STEWART'S
Ditching & Grading Machine

WE, THE UNDERSIGNED, HAVING BEEN PRESENT AT A TRIAL AND carefully examined the workings of the Machine recently invented by Mr. Henry Carter for the purpose of making Open Ditches, Grading Roads and Subsoiling, consider the said Machine admirably adapted for performing all the operations claimed by the inventor, and we feel justified in recommending this Machine to the Municipal Officers of every city, town, village and township in the country, satisfied that a very great saving will be made to the public by using the said Invention for improving the highways of the country. The Machine is exceedingly simple in construction, substantially put together, and not likely to get out of order. A man and heavy span of horses can handle it as readily as an ordinary plow. We also highly recommend this Invention to Farmers who contemplate Open Ditching, Road Grading and Subsoiling; also to Railroad Contractors for Grading and Ditching:—
