R. DALE, S. QU'APPELLE, SASK.

more than insular importance. It is not merely to the exhibitor a carnival, and to the breeder a school, but to the outside world it is the country's advertisement. At our big spring show, under the auspices of the Royal Dublin Society, towards the end of April, all three functions were faithfully discharged. Visitors to the number of close on 20,000, from near and far, had an opportunity of examining and admiring the results of our herd owners' skill and enterprise. Just 450 exhibitors of cattle, pigs, heavy horses, hackneys and ponies, and dairy produce, had prizes exceeding £3,400 in value to compete for, and, lastly, the ordinary farmer was privileged to inspect hundreds of object-lessons in the art of breeding and showing among the 1,200-odd animals exhibited, thus gaining a clear insight into the ideals of those who are moulding animal form. Besides these there were 180 exhibits, some of them very extensive and elaborate, doing duty for the leading firms who cater for the farmer's needs in the matter of feeding stuffs, seeds, veterinary specifics, and machinery and appliances of all kinds, the great majority of the last named being shown in motion.

Taken all round, the exhibition was a grand one, and a distinct credit to a country which has, of late, deservedly claimed a prominent position for pedigree-stock-breeding. Some of the best known experts from England and Scotland acted among the judges, and close on 20 prominent breeders from England and Scotland contributed high class exhibits. According to the cross-Channel papers, their object was to show us what good cattle should be. Possibly, but such delightful unselfishness is rare, and I think the likelihood of winning prizes amounting in some classes to £25 and £30 each, had something to say in this matter. Except in a few of the Shorthorn classes, Irish-bred animals more than held their own, as will be indicated later on.

The proceedings lasted four days, and interest never flagged. When the judging had been completed, auction sales began, and occupied the best part of two days, a very sound trade being experienced, especially for all bulls entitled to hold premiums under the scheme of the Department of Agriculture. Such selected sires—just 220 were chosen—were quickly disposed of at from 35 gs. to 55 gs., which ranged from £5 to £10 above those ruling on the corresponding occasion last year, although individual prices were hardly so high.

I do not propose in this article, to deal with the details of the awards in the various sections. Canadian readers are more likely to be interested in a few impressions as to how the rival breeds of cattle are progressing in Ireland, as suggested by the big show. Taking first the ever-popular and cosmopolitan Shorthorns, which are facile princes at Ballsbridge, as elsewhere, we had this year a grand turn-out of 573 entries in 13 classes. The practical observer of this magnificent display could not but be impressed with the vast contrast that it presented with the class of coarse, leggy Shorthorn so common eight or twelve years ago. Now they appear as a shapely, good handling and deeply-substantiated lot of capital market value. The great improvement that has taken place has often been appreciatively commented upon by English and Scotch authorities who have had to deal with us for store stock. The Shorthorn, of all breeds is the one most likely to blend with the common cows of the country, as they resemble it rather in type, and the well-bred premium bulls which have during the past eight years been sent through the country have given the tenant-farmer a boon, which his brother breeders of equal status in either England or Scotland do not possess. If the Dublin show is a criterion, then a wonderful levelling up of pedigree Shorthorns has taken place, though there is still an amount of roughness to get rid of. The beef type has been the sort most favored, and this can be carried too far in a country which must primarily be a dairying one. Latterly, however, this

Traction Engineering

Traction Engine Practice teaches student how to line up, fire under load, clean boilers, engine driving, etc. College furnishes four traction engines for student practice.

Shop Work teaches pupils how to forge and temper chisels, make welds, rabbit bearings, set and repair flues, repair machinery, test boilers, put in stay bolts, grind and set valves, etc. Not a short lecture course, but a three-months' course, where a student is taught to do the work himself. Correspondence course if desired. Send for catalog. Highland Park College of Engineering, Des Moines, Ia.

Into a general store of a town in Arkansas there recently came a darky complaining that a ham which he had purchased there was not good. "The ham is all right, Zeph," insisted the storekeeper.

"No, it ain't, boss," insisted the negro. "Dat ham's shore bad!" "How can that be," continued the storekeeper, "when it was cured only last week?"

The darky scratched his head reflectively, and finally suggested: "Den mebbe it's had a relapse."

Human Life Increased BY FOURTEEN YEARS

Longer life due to better understanding of Nature's Laws and use of such medicine as DR. CHASE'S KIDNEY-LIVER PILLS

During the last century the average life of man has increased by about four years. Insurance statistics prove this.

What is the reason? People are learning to take better care of their health and to follow the laws of sanitation and hygiene.

The first law of health and the most important calls for, "Daily movement of the bowels."

Dr. Chase's Kidney-Liver Pills have helped to prolong the life of many because they have enabled them to follow this first law of health.

A torpid, sluggish condition of the liver and kidneys is certain to bring constipation of the bowels, clogging of the digestive and excretory systems, poisoning of the blood and give rise to the most dreadfully painful and fatal of diseases.

Dr. Chase's Kidney-Liver Pills purify the blood and cleanse the system as no other treatment can because of their unique and combined action on the filtering and excretory organs—the liver, kidneys and bowels.

Mrs. R. Morrow, Bracebridge, Ont., writes:—"For years I was troubled almost constantly with constipation of the bowels and never got anything to do me the lasting good that has been obtained from Dr. Chase's Kidney-Liver Pills. They not only relieved that trouble, but have entirely cured the headaches from which I used to suffer, and have improved my health in a general way."

Dr. Chase's Kidney-Liver Pills. One pill a dose, 25 cts. a box, at all dealers, or Edmanson, Bates & Co., Toronto.
