"International Hoof Ointment"
"International Harness Soap"

Also "Jewel Incubators" and Brooders, and Jewel Chick and Hen Feed.

DAN PATCH 1:55% MAILED FREE.

We have a Beautiful Color Picture of our Champion Pacer, Dan Patch 1:55%, size 16x24. Free of advertising, fine picture for framing, gives all the records made by our pacer wonder. We will mail you one free, postage prepaid, if you will write us how much stock you own and name this paper. Write at once to
INTERNATIONAL STOCK FOOD CO., TORONTO, CANADA.

hibition. It is well known that we can grow wheat in Manitoba, but is not so well known that we can grow some very good apples, crabs, plums, etc., to say nothing of the other fruits, flowers and vegetables which will undoubtedly be seen when the time for the fair comes around.

HORTICULTURIST.

MANITOBA MARRIAGE LEGISLATION.

The Legislature of Manitoba has recently been considering the subject of the marriage laws of this province. The particular point that received attention was the fixing of the marriageable age for girls, and opinion was pretty equally divided on the subject. The fact that the other provinces and England fixed the age at fourteen made many of the members in favor of adopting the same age limit and so securing uniformity in this matter. They believe that up to the present no harm had resulted from having the standard fixed at fourteen.

On the other hand, about the same number were strongly in favor of raising the age to sixteen or even eighteen. These latter supported their position with strong arguments. They held that a girl at the age of fourteen was not fitted mentally or physically for matrimony, and that becoming a wife at so tender an age she was deprived of the joys of girlhood which were her right. Another reason advanced for their opinion was that, though the custom of youthful marriages did not obtain to any large extent among the Anglo-Saxon portion of the population yet the great crowd of foreign-born in our province must be considered, and well authenticated cases have arisen among these new-comers where the children were practically sold at a tender age. While uniformity of law among the provinces was desirable yet each province had its peculiar problems to be met in its own way, and if the age limit of the other provinces was too low, it was better for Manitoba to set a high standard and let the other provinces come up to it.

After much serious consideration, and a good deal of discussion the amendment placing the age at sixteen when the parents have given their consent, was passed by a small majority.

It is interesting to note the ages at which women are allowed to marry in other countries beside our own. In Austria the limit for girls is placed at fourteen, as in England; in France at fifteen; while in Spain it is only necessary for the prospective bride to have reached her twelfth year, and Portugal follows the example of Spain in this respect. In Russia the girl is allowed to remain free until she is sixteen, but in Turkey an understanding of the words of the marriage service is all that is required. The early marriages among Asiatic peoples are familiar to every one. India being given over entirely to child marriages where girls of eight or nine are married to boys of twelve or fourteen.

FEEDING CONDIMENTS.

It is almost universally admitted that for winter and spring feeding something in the nature of a condiment is required as an aid to the digestion of food which lacks the aroma and flavor of a good pasture. Various stock foods are flashily and extensively advertised for this purpose. Many of them are altogether useless but even with these, the inducements offered by their promoters are so great that feeders from one end of the country to the other have tried them. Of course a trial has proved their worthlessness and the consequence is that many country merchants are stocked up with quantities of stock foods for which there is no sale. Advertising will sell a new article but after that article has been tried by the public and found wanting, no amount of advertising will induce the public to buy it the second time.

With Herbageum it is different. Herbageum is the true condiment. It has been on the market for twenty-two years and when a feeder has once fairly tested it he continues to use it and always has a good word to say for it. It is the same with the merchant who handles it. He has a friendly feeling towards it. He feels safe when he recommends Herbageum to his customers and although he would at times like to have it in a fancy package so that he might make a window display of it, he knows that fancy packages cost money and with Herbageum the money's worth is in the goods.

Here is a letter from a Flour and Feed and Seed Merchant of Thorold, Ont. "For a number of years I have been selling Herbageum, and every customer who has tried it has a good word for it. The extensive advertising of some of the stock foods has forced me to handle them, but a test of them always proves them to be far short of Herbageum in results, and customers soon return to Herbageum. I use it in my own stable and find nothing to equal it."

(Signed) A. McClenchy.

Thorold, Ont. Feb. 20, 1906.

Are You Tired of Drugs?

The Remedy of To-day Given to Sufferers upon Absolute Free Trial Until Cured. Not One Penny in Advance or on Deposit.

This is the age of Electricity. To-day the accepted light is Electricity. To-day we can talk with a friend in any town in Canada through Electricity. To-day we can reach China with a message within five minutes, through Electricity. To-day we know that the whole planetary system is absolutely controlled by a vast Electric current. To-day we know that life itself cannot exist without Electricity, and hence the thinking man of to-day also knows that health is directly dependent upon Electricity. A sufficiency of it in the body means health—a deficiency, sickness, weakness and disease.

Less than a hundred years ago none of these facts were known. To-day they are all accepted as indispensable necessities except the last, the most important of all—THE FACT OF ELECTRICITY BEING HEALTH. Upon this great living truth some people are still sceptical, but the day is fast approaching when the sick will as naturally look to Electricity for relief as the thirsty look for water. I have carefully watched the trend of Electrical progress in this direction for the past forty years, and I assert that there will be a constant increase in disease and suffering until Electricity is as freely adopted by the sick as medicines and drugs now are. I claim that as there are no mistakes in nature, she has a remedy for every discord, whether it be in the elements or in the human body. She uses Electricity to clear and purify the atmosphere when congested or out of harmony. She would do the same for the sick and disordered human body if allowed.

Most of the diseases that afflict mankind are due to a lack of electricity in the system. In these strenuous days, who is there who has not wasted his vitality or natural electricity by overwork, worry, excess or some disobedience of nature's laws? If you are weak or ailing and have not found a cure through the old-fashioned methods of treatment why not turn to this great natural source of life and strength, and give Electricity a trial? My newest Herculex Appliance, patented March 7th, 1905, is worn about the waist either day or night, and gives a prolonged, mild, soothing, vitalizing current, which so fills your body after a few hours' use, that a feeling of glowing, sparkling vitality, strength and confidence immediately takes possession of you. I invite you to try this Appliance at my expense and risk, for I am confident a cure will result. A call or letter will bring you one on absolute

Free Trial Until Cured.

You ought to be cured in about 60 days, and when well I expect you to pay me the price of the Appliance—in many cases as low as \$5. If not well or satisfied, simply return the Herculex to me and the transaction is closed. Should you prefer to buy outright for cash, I give a liberal discount.

I give the Herculex on the above terms to all sufferers from Nervousness, Lost Vitality, Rheumatism, Lumbago, Sciatica, and Stomach Trouble, Varicocele, Kidney and Liver Complaint, etc.

As the originator and founder of the Electric Body-Battery system of treatment, my success is the envy of many and I am flattered by many imitators, but my great knowledge to advise and direct my patients is mine alone and cannot be imitated. My advice is given free to all my patients until the cure is complete. My Herculex is guaranteed for at least one year.

Call or send for one to-day, or if you want to look into the matter further, I have two of the best little books ever written on Electricity and its medical use, which I send free, sealed, to all who apply.

Dr. C. F. Sanden, 140 Yonge Street
Toronto, Ontario.
