Alberta

Alberta

is the bright spot on the crop map of Canada this year---and, in fact, one of the few bright spots on the Continent

With little more than half a crop elsewhere in Canada and the United States, Alberta has safely harvested a crop of more than normal size. From such returns as have been received we estimate the average yield at 28 bushels for wheat, 45 bushels for oats, and barley at 30 bushels per acre.

Considering present prices for grain and livestock, Alberta seems in a fair way to surpass last year's total agricultural production in point of value, and provide a greater net return per capita for the farmer than any other state or province to date.

Travellers through Alberta's wheat belt have had revealed to them scenes of agricultural productivity unapproached in any other part of the world.

Alberta farms selected with even moderate discretion have raised men to independence and

affluence with records of wonderful development unsurpassed amongst the phenomenal industrial success of which Canada well may boast.

Many almost incredible yields have been reported by reliable authorities, wheat exceeding 70 bushels and oats 145 bushels per acre.

Alberta has the proud honor of producing the wheat king of the world. Mr. Charles S. Noble, of Nobleford, Alberta, has broken the world's record for 1,000 acres, threshing 54.23 bushels per acre of No. 1 wheat.

Numerous records show that the cost of farms have been more than repaid by this year's wheat crop. In one instance land purchased for \$3,200 produced wheat which was sold for a little over \$10,000.

Alberta still has thousands of free homesteads, many of which are within close proximity to railway facilities awaiting settlers.
