Hints on the Care of Plants.

Not one farmer in a hundred knows a much about grass as he should than a window full of thriving plants in Make a study of grass this season,

Is your farm so well kept that you nothing half so cheerless as a lot of Priend.

The trouble the novice in window gardening usually has in making plants thrive is because she does not understand adding nature by simple and harmless timulants. Then the red spiders and green flies are another enemy to the get the best results handling and training should begin when the colt is very young. Let the boy's acre be the best acre on the farm and his tools first class, the girl's cow the best in the herd, and the wife's "help" the best that can be procured.

If you do not want the sills of your barn and sheds to decay, keep the dirt away from them so that they will remain the green flies are no further signs of the greaten form and sheds to decay, keep the dirt away from them so that they will remain the green flies are no further signs of the pestiferous little plagues. This bath not only destroys the insects, but this spring she sweeps everything behind her.

Minard's Liniment cures Garnet in Garnet

The season when most work is done on dust is an enemy to the plant growth in this Province

A small hand broom makes a good Do not attempt under any circum article with which to spray plants. Dip tances to keep 300, or even 200, adult it into a basin of luke warm water and fowls in one flock. Broads of half grown then beat the broom smartly against the chickens may be united in the fall until there are 500, when there is an unlimited range, but grown fowls never. In one several dippings of the broom will ear by persons who have to listen to you
