

## EVENTS.

THE DAY CHANGES WEEKLY.  
Subscription: \$1.00 Per Year.  
All subscriptions must be accompanied with cash. Advertisements will be charged 5¢ per line.

ANSLOW BROS., Publishers.

## DO NOT KICK.

IN making a few changes in Events made-up last week we were obliged to hold new positions for some of the advertisements. In one instance which has been forcibly impressed upon us this change was necessitated and we were even accused of unmanliness. Why? Because we had the nerve to "make up" Events so that it would be presented in a brighter and more attractive form.

This change will eventually benefit every advertiser as it is our intention to make the whole eight pages of universal interest so that your advt. will not of necessity have to be on the first, or and particular page or position, to be seen and read.

It is not the position of an advertisement which makes it attractive and a drawing card for the establishment which is running it but rather the individuality of such advt. If your announcement each week contains nothing new and fresh it would be like a newspaper which each week failed to be bright and interesting, it would soon cease to be a paying investment.

In the instance above quoted the advertiser has cut out his advt. because we would not give him a position in that part of Events which is supposed to contain news.

We have columns for advertisements and also columns for news and to these respective columns we will endeavour to confine the announcements of our patrons and the current news of the day.

It is our earnest endeavor to turn out a bright newsy paper, one which will be alive to the interests of the Bay Chaleur country and we are sure we will have the support and assistance of all true and loyal citizens.

## TREE PLANTING.

THE suggestion thrown out by Mayor Murray at the last meeting of the Town Council that the Council take some measures to encourage the planting of trees along the streets is one worthy of consideration by our citizens. This is a subject which is receiving much study and attention by many of the city fathers throughout the Maritime Provinces and is a step in the right direction.

We are glad to learn that the School Board has taken up this matter and that Friday, May 27th has been set apart as a day for tree planting.

Many of our private citizens should take this matter up and as this is the proper time to plant trees should do so at once and add to the attractiveness, not only of their property, but of the town.

## THE SIDEWALKS.

THE plank sidewalks in the Town of Campbellton are in a disgraceful condition. This is more particularly so on Water St., the principal thoroughfare of the town. Something ought to be done at once. The present mode of repairing the walks by means of a board or slab nailed over the hole, while it covers the hole, is not a commendable one as it makes it very unpleasant to go stumbling over these if you are not aware of their presence.

We understand that this street has been neglected from year to year in the hope that next year

would see permanent walks put down, but as time passes and other things seem more pressing these are held over for another year and with the large amount of work before it this year it is not possible for the town to undertake so great a work. A plank walk should be built at once so that the limbs and lives of our citizens may not longer be endangered.

## THE CANADA EASTERN.

THE absorption of the Canada Eastern by the Intercolonial system will meet with the hearty approval of the people in all sections of this county. Newcastle may be made the eastern terminus of the main line from Fredericton and a despatchers office established here or the one at Campbellton removed here. The absorption will probably result in a better development of the Miramichi country and it may also add to the revenue of the Intercolonial system. —Advocate.

It is hardly probable that the despatching office would be moved from here as already there is too much work for this division. What is more probable is that if the C. E. R. is taken over another division will be made with Newcastle as the headquarters.

## A BATHURST APPEAL.

LE Courier des Provinces Maritimes of which Bathurst Journal Mr. Turgeon, M. P. is the editor, is rather imperative in the demand for the appointment of a French speaking senator to succeed Mr. Dever. The Courier says that the Acadians are very loyal, "but loyalty does not signify the denial of rights." Loyalty ought to be mutual. It does not permit injustice.

"Since 1896" says our Bathurst liberal friend, "the Acadians of New Brunswick have claimed from Sir Wilfred their right to a fair representation in the senate. At each vacancy the government has responded to the Acadians, 'Wait.' They have waited."

All the same among them, as among others, the time comes when patience ceases to be a virtue and they demand to-day of the government, the fulfilment of a sacred promise postponed often enough for purely political reasons. Temporizing has no longer reasons for being. It will now be an injustice. . . ."

The arrival to power of Mr. Emmerson was greeted by the Acadians as the beginning of an era of peace and justice, of loyalty and generosity. They were his friends, sincere and devoted. They expect from that large breast, from that generous soul, the recognition of an undeniable right which his predecessors with less appreciation have long refused. —Sun.

## THE PRODUCTION OF SALMON.

Ottawa, May 12.—The United States Government, through the British Ambassador at Washington, again has expressed a wish to unite with the Canadian Government in a measure for the protection of salmon fisheries on the coast of British Columbia. It wants to assist in the creation and maintenance of a new hatchery in British Columbia. The feeling here against granting the request is very strong Montreal Star.

There are four salmon hatcheries already in operation in the Province of British Columbia. These are owned by the Dominion Gov't and one was built last year by the Provincial Gov't. Since the introduction however of the new trap net, which is also to be used on the Canadian side, it is clear that artificial propagation is the only means of saving the fishing from extinction.

The deadly trap nets are constructed of large piles, many hundred of fathoms of net being used. A single trap costing some \$5000.00 has been known to capture 1500 to 2000 salmon in the 24 hours.

A Deputation of American Cany-men interviewed the Provin-

cial Gov't a short time ago, declaring they were willing to expend \$100,000.00 in building and maintaining salmon hatcheries on the Fraser River, if the permission were granted them. The request was refused on the ground that such international work was liable to lead to friction and trouble.

## DUTY ON BRINE

WHILE some people in the United States are talking about reciprocity with Canada the customs authorities of that country are trying to make their tariffs as onerous as possible to the people of Canada. The latest move for that purpose is the ruling of the general Board of Appraisers of the United States that brine in which salt fish is packed is subject to duty; this ruling is on the same footing as the ruling of the same board, making the cans in which lobsters were packed subject to duty, although the lobsters themselves were free under the terms of the Treaty of Washington. This was justly looked upon as a swindling evasion of the terms of the treaty and it provoked much indignation in Canada. The fish dealers of the United States have all protested against this new duty upon brine, but whether their protest will be effective remains to be seen. The people of Canada have long ceased to expect any fair play from the United States with respect to trade and it should be the duty of the Government of Canada to meet the United States tariffs on our exports with a similar tariff, so that they may receive precisely the same treatment from us that we are receiving from them. —Gleaner.

## DALHOUSIE.

(See First Page)

had to be carried which was a great drawback to trade generally. With a good wharf at Miguasha and with the convenient landing we have at Dalhousie and the improvements made to the steamer "Florence" the ferry service between Miguasha, Dalhousie and Campbellton should increase the passenger travel and benefit business.

Sheriff Stewart is now residing in town. His amiable family is quite an addition to social circles. The Sheriff is progressive and intends improving the Court House grounds by planting some ornamental trees. This should have been done by our municipal council long ago.

Mrs. C. H. LaBelle who has not been enjoying the best of health has gone to Quebec for a few weeks where she expects to be greatly benefited by special treatment.

Mrs. Disbrow and Miss Disbrow who have been residing at Jacques River, during recent years have returned to occupy their old home in Dalhousie. They have received a hearty welcome. Mrs. Disbrow intends improving her residence and grounds.

Dr. L. W. Doucet has purchased the Miss Gordon cottage. Miss Chaytors of Point LaNim, who was called to England recently on account of the serious illness of her grand-mother has reached destination safely. She called her friends this week that the sick lady is in critical condition. Miss Chaytors may spend several months in the old land.

Mrs. Geo. E. Mercier returned on Monday's Admiral from a trip to Port Daniel.

Mr. and Mrs. Loyd McEwan Miguasha were in town on Tuesday.

Among the improvements made in Dalhousie are the tasty little offices built by Messrs Geo. Moffat and W. S. Montgomery and a new plate glass front placed on the store occupied by the Dalhousie Mercantile Co Ltd. The latter work was done by Messrs J. and D. A. Harquail.

Keep Minard's Liniment in the house.

## Mill Property for Sale.

FOR SALE—Mill Property and Lumber Limits. Rotary and Shingle Mill with 3½ miles Timber Limits in the Province of Quebec. The Mill is situated at Champlons Siding.
