## Some Facts about the New 22-inch Wallpapers

SO CALLED 22 INCH PAPERS ARE REALLY 21 INCH WHEN  
TRIMMED READY FOR HANGING

There is no saving in buying 18in papers. The total cost including labor when 21in. papers are used works out cheaper because of the fewer number of rolls to hang.

The 21in. papers make a better job because there are fewer seams, less matching and consequently less waste.

If it takes 12 strips of 18in. paper to cover a certain wall it will only take 10 strips of 21in. paper to cover the same wall.

18in. papers are not longer than 21in. papers, both are the same length, 8 yards per single roll, but the wider papers permit the use of a better design with a more distinctive and pleasing effect when hung.

All of our new papers are 21in. and many are semi-trimmed.

See our new samples before deciding on your paper.
