If you are, you either shave yourself or go to a barber. If you visit a barber you may have the unfortunate experience of Mr. M. Butler, of Bridgeport, Conn., who developed what is known as "Barber's Rash" on his face through the use of an infected razor. He writes:

"My face was covered with sores, which caused me a great deal of suffering and inconvenience, and I was unable to shave for four weeks. Repeated applications of Zam-Buk, however, entirely rid me

of the trouble." To avoid the possibility of such an experience, immediately you see a rash or spot appear, treat it with Zam-Buk. This balm will destroy all germs, prevent the disease spreading and soon end the trouble. For eczema, old sores, ulcers, blood-poisoning, burns, and cuts there is nothing to equal Zam-Buk.

THE finest town buildings soon get to look "dingy" if I they are not kept painted.

Worse still, the omission of the Spring painting leaves them open to weather-attack and time's decay. And—with materials so high as to make every building worth double today what it was worth in 1913-you are making a mistake if you let a building "go to seed." Have your town a "model" town-have it fresh with paint-

have it protected with a paint that affords real protection-

-II "ENGLISH" 70% Pure White Lead (Brandram's Genuine B.B.) PAINT 30% Pure White Zinc 100% Pure Paint

If this paint were sold at a price half as high again as any other (which it isn't) it would still be the economical paint to use on your house. In sheer covering capacity it has no equal. A gallon of it goes so far that you'll buy less of it and yet do more with it. Paint with B-H "ENGLISH" PAINT this spring—and your house is protected for years, where a coat of ordinary paint will last but a few months.

The difference lies in the above formula basis. What other paint is so correct in this respect that its makers guarantee it? What paint can a dealer furnish you that has anything like the quantity of white lead in it that has B-H "English"?

This was the formula when lead was lower in price—this is the formula still; even though lead is extremely high in price. It HAS to be the B-H formula; because the guarantee that calls for it, is printed right on the B-H cans. We could not cheapen B-H "English" Paint even if we wanted to. So it's your safe paint as to quality, your sure paint as to covering capacity, your dependable paint as to durability. Find the B-H dealer in your town. He's the man to buy from.
