**Grain Crop Report**

Ottawa, June 13.—A bulletin of the Census and Statistics Office issued today gives preliminary estimates of the areas sown to the principal grain crops and reports on their condition at the end of May, according to the returns received from crop-reporting correspondents throughout Canada.

The reports show that the month of May proved cold and dry with frequent night frosts and that these conditions, whilst favourable to seeding, retarded the growth of the crops sown and caused them to be unseasonably backward.

The total area under wheat in Canada is provisionally estimated at 9,816,300 acres, or 57,900 acres more than in 1912, the area in spring wheat being 8,990,500 acres, or 13,100 acres more. Oats occupy 9,608,500 acres compared with 9,216,900 acres in 1912 an increase of 391,600 acres, barley occupies 1,425,200 acres, an increase of 425,200 acres, an increase of 10,000 acres and rye 126,500 acres, a decrease of 9,610 acres. For wheat, barley and oats taken together the increase represents 459,500 acres. The estimated acreage under hay and clover is 7,475,600 acres compared with 7,633,600 acres last year.

For the three north-west provinces of Manitoba, Saskatchewan and Alberta the total wheat area is estimated at 9,013,800 acres, as compared with 8,961,800 acres, that of barley at 852,600 acres compared with

809,800 acres, these differences representing increases of 52,000 acres for wheat, 293,800 acres for oats and 32,800 acres for barley, or 388,600 acres for the three crops.

On May 31 the condition of the crops was reported as generally favourable throughout Canada. Expressed in percentage of the usual standard of 100, taken as representing the promise of a full crop, the condition on May 31 for the Dominion was as follows: Fall wheat 89.62, spring wheat, 91.55, oats, 91.72, barley 91.19, rye, 87.70, peas, 88.24, mixed grains 90.15, hay and clover, 81.12, pastures, 85.08 and alfalfa 77. At the corresponding date last year the condition of fall wheat was only 71.46. All the other crops were then above 90, excepting rye, 87.24, peas, 83.85 and mixed grains, 87.72. The poor condition this year of alfalfa is due to the effects of the winter and cold spring.
