“ “ “ Accommodation.....	4
“ “ “ Ball of the eye.....	5
“ “ “ Orbit.....	0
Total.....	100

The proportion in which ophthalmic cases exist in proportion to a given population it would be difficult to ascertain; I will however, venture the statement that they exist in this vicinity to the extent of about one per cent.

Hamilton, C. W. September 21st, 1862.

ART. L.—*Frozen Parts—Frost Bites.* By R. NELSON, M. D., New York.

Read before the N. Y. Medico-Chirurgical College, Dec. 27, 1860.

This paper is not called for in this region of New York, where the cold is seldom sufficient to freeze people; but in the north and north-west it may be useful, as giving a rational statement of what ought and ought not to be done in
