

Faculty, every member of which is devoted to and zealous in his work. With a past of which we have no reason to be ashamed, with a present full of promise, we have every reason to look to the future with hope and confidence that the labours of those who have gone before have not been in vain, but that they to-day are bearing rich fruit, and that in the future they will bear it more abundantly.

---

Prof. R. Ramsay Wright of Toronto University, was next introduced. We herewith give his remarks.

MR. CHANCELLOR :—My first duty on the present occasion is to offer to Queen's University, through you, the congratulations of the University of Toronto on the various events which you are about to celebrate during these festivities :—The formal installation of a new Principal who has already shown such aptitude for his high office, the Jubilee of the Medical Faculty, and the inauguration of new structures devoted to University work ; also to felicitate you, Mr. Principal, on your having been called to fill such an honourable and responsible position from which you will guide the future development of this University.

My second duty is to thank the Medical Faculty for the honour they have done me in asking me to address the medical students, and to express the hope that both Faculty and students will share in the invigorating and inspiring influences which attend such speech-making events in University life as those which are being celebrated just now.

It was natural in responding to such an invitation that I should select some topic bearing on medical education, seeing that, during my long connection with the University of Toronto, I have had my share in shaping the policy of the University in regard thereto, and have especially concerned myself with its scientific aspect, and its relation to the sciences included in the curriculum in Arts.

Recognizing that the young man setting out on his medical studies is apt to chafe at the obstacles which these sciences
