

test and much on all sides. Hydro will be submitted to existing and of
the various forms of energy available at the present time and the
best form of power will be selected. This will be done by the Ontario
Power Commission, which will be responsible for the development of
the project. It will be the responsibility of the Ontario Power
Commission to see that the best form of power is selected and that
it is used in the most efficient manner.

The Ontario Power Commission will be responsible for the selection
of the best form of power and will be responsible for the construction
and operation of the hydroelectric plant. The Ontario Power
Commission will be responsible for the selection of the best form of
power and will be responsible for the construction and operation of the
hydroelectric plant.

The Ontario Power Commission will be responsible for the selection
of the best form of power and will be responsible for the construction
and operation of the hydroelectric plant. The Ontario Power
Commission will be responsible for the selection of the best form of
power and will be responsible for the construction and operation of the
hydroelectric plant.

The Ontario Power Commission will be responsible for the selection
of the best form of power and will be responsible for the construction
and operation of the hydroelectric plant. The Ontario Power
Commission will be responsible for the selection of the best form of
power and will be responsible for the construction and operation of the
hydroelectric plant.

(2) An expert
of the Canadian
Government
on the construction
of the hydroelectric
plant has been included

(3) Mr. H.D. Rothwell, of the Ontario Hydro, has been
appointed liaison officer on the project, and the
advisory committee reports to him. His responsibilities
will include rehabilitation, community planning, historic
sites, scenic beauty.

(4) An aerial survey has been completed by Ontario Hydro
of the Ontario shore to a depth of six miles from
Prescott to Millie Rothes. Maps with the scale of
1,000 feet to the inch are being prepared and they
will prove valuable in discussions between the
Province, municipalities and individual property
owners.

(5) Soon the Hydro Commission will call a conference of
the municipalities to be affected by the St. Lawrence
development.

(6) It is the intention of the Provincial Government and
the Commission that the whole area involved in the
St. Lawrence development will be restored with
improved municipal services achieved through close
and friendly co-operation between provincial and
municipal agencies.

VI. Conclusion

I want to make it quite clear that anything I have said
in this speech is not submitted as a solution or the three
problems of rehabilitation which will arise in connection with
the St. Lawrence project. It has been submitted simply to draw attention
