

(d) **Entel Direct**

This service has been created to make calls easy and fast when a person is outside of Chile, he can make use of this service by applying his Entel Credit Card or through a collect call. By dialling a certain number a communication is directly established with the international Entel Chile operator.

(e) **Countries Direct:**

The countries direct service has been developed by Entel in conjunction with outside telecommunication companies with the purpose of providing communication services for those persons that are temporarily in Chile and need a fast communication with their native country either by using the credit cards from other telephone companies or through collect calls.

Other services include Entel Card (which is the telecommunications-credit card), maritime mobile communications via satellite, (which is the service that allows Chile to be connected by telephone with any ship or vessel located in the ocean), and Business Line 1-800, (which is the reverse charge or collect call automatic telephone system as part of the new telemarketing systems provided by the company).
