distribution and provision for poultry and dairy farmers in this country.

This petition calls upon Parliament to instruct the Government of Canada to keep the Canadian supply management system intact and to protect it in its entirety at all costs in the current GATT negotiations and not to sell this country down the drain, as it has been doing for the last six years to the great detriment of Canadians in a way that has hurt our economy. It has sold out our country to our neighbours, which is a deliberate attempt to attack our supply management systems which have been so effective for the benefit of Canadian farmers.

These people have signed this petition hoping that the government will listen to their concerns and protect the Canadian farmers instead of selling them down the drain as they have been doing for the last six years.
