- 2) To provide the best possible equipment for laboratories and work shops
- 3) To provide adequate accommodation in class rooms laboratories libraries
- 4) To make the campus extensive, well equipped and up to date
- 5) To encourage research work intelligently and extensively
- 6) To build up a strong graduate school
- 7) To build dormitories to house all students not already provided for
- 8) To increase the number of available scholarships

Consideration of Gymnasium etc

is, usually considered at <sup>Stadium</sup> ~~Gymnasium~~,  
 Most profound change has marked attitude of universities to athletics  
 in last 10 yrs. particularly since war  
 President angel likened the system to "a kind of athletic octopus  
 which had fairly engulfed many an institution, distorting its  
 primary functions and poisoning much of its inner life"

Bad influences

Control of athletics from outside, professional coaches, sporting alumni,  
 Complete distortion of the perspective of moral values. Make team at any cost  
 College work and all things intellectual go into discard. Praise of sporting editors,  
 No touchy thought on essentials of life, coach most important person in university  
 team known as Staff warriors, system stresses money, paraphernalia of attendants  
 doctrs, uniforms, luxurious travelling, charges of food, fresh exhibition of bad manners  
 Make for enthusiasm & sturdiness, courage physical, but then at sacrifice of  
 moral.

Different outlook now. (Read angel's "I do not believe")

- 1) To accept frankly and courageously with all that its obligations imply, the entire lack of physical and moral education of students
