## Light Houses.

*Fort Amherst Light at the entrance of St. John's*—A Light was first established at this station in 1813; in 1850 a new House, Lantern and Apparatus were erected. The light burns at an elevation of 114 feet, is produced by a treble argand burner placed in the focus of an annular lens of the fourth order, and in favorable weather can be seen 16 nautical miles. When Cape Spear is enveloped in fog a heavy piece of ordnance is also discharged at this Fort every hour during day light, to assist vessels in making the harbor. It is situated in lat. 47.33.54 N., and long. 52.40.18 W. John Sheppard, Keeper; Austin Sheppard, Assistant.
