which resulted from the recent note issue.

Last week's steady enquiry for high-grade securities was again in progress, but in reduced volume. The source of the enquiry suggested that many national banks are about to reinvest a part of their reserve moneys, which will be relased a week from today, when the new federal reserve system becomes operative.

Steel and Iron.

News regarding the steel and iron industries was more hopeful, despite the report that some of the large plants are considering a further curtailment of operations. There has, however, been a moderate increase in orders of a miscellaneous character, but the absence of new foreign business is the main cause of disappointment. This condition is likely to be reflected in the October statement of the U.S. Steel Corporation, to be issued omorrow. The government reports on corn and cotton were in line with general expectations, Cotton exports for the past week were considerably under the preceding week, and a further decrease is not impobable, unless certain restrictive insurance clauses are overcome.

Big export business, especially at Duluth and Kansas City, helped rally the market for a while, but the effect was not lasting. Talk of a serious shortage of ocean tonnage caused a good deal of uncertainty and was not much offset by opinions expressed that vessel room to Europe would be more readily obtainable in the near future.

Unfounded fear of a bearish crop report from Washington weakened corn. The government estimate proved bullish. Farm reserves, tho, were larger than expected.

Canadian Press Despatch.

MONTREAL, Nov. 9.—At the Montreal Stock Yards west end market an easy feeling continues to prevail for cattle, owing to the liberal supplies coming forward, but prices were practically unchanged from last week. Trade in fairly good steers was fairly active, of which the supply was fair, and sales were made at \$7 to \$7.25, while fair stock brought from \$6 to \$6.75 per 100 pounds. There was no further change in the condition of the market for sheep or lambs, but the feeling was strong, and the prospects are that prices will go higher in the near future, owing to the fact that supplies are falling off. Ontario lambs brought \$7.50 to \$7.75, and Quebec \$7 to \$7.25, while ewes brought \$7 to \$7.25 per cwt.
