14 SATURDAY MORNING

Ten New Fields Demanding Ca pital for Development-Claim Buyers Becoming Keen-Toronto Will Feel Activity Shortly. f

"Toronto will see another gold boom shortly," prophesied one of Toronto's most far-sighted financiers a short time ago. "Perhaps you will misur derstand me and start thinking of the sange thas the sold his claims to visiting derstand me and start thinking the sold his claims to the man who had turned him down to the anything like those booms. It will be one of intense mining property development, the like of which worthern Ontario has not seen before there will be light, if any, of the 'wildcatting' by penny financiers and procupine, but one of honest effort or northern Ontario."
This prophesy. made by a Toronto man who has successfully guided than the same change is taking place and the development of Cobalt and other valuable minerals.
This prophesy. made by a Toronto man who has successfully guided than to the development of cobalt and other valuable minerals.
This prophese, made by a Toronto man who has successfully guided the data the same change is taking place of companies whose stock he is consumating the same change about the holding to companies. Whore the development of Cobalt and other valuable minerals.
This prophese, made by a Toronto man who has successfully guided the data dother valuable minerals.
The determined lides of prophese the data there there are the data there to the buyer of mineral the same the same there to the buyer of mineral the same the same there to the buyer of mineral the same there there to the buyer of mineral the same there there the holding the same there th

who has successfully guided the iles of several large financial institutions, will come as a surprise to minety-nine out of a hundred Toronto ss men, and the hundredth knows what is going on in Northern Ontario. In war times such a pro-phecy sounds at first like an absurdity, out on close investigation of the in-United States and into recent hap-penings in Northern Ontario's gold camps it becomes even more than, a probability. In fact. the boom is on now, as a trip to Northern Ontario would prove to the skeptical. More Real Prospecting.

stakings more carefully and with Lie intention of proving them to have mine possibilities or abandoning them. The attitude of mining companies and other purchasers of prospects has been revolutionized atong the same lines. There was considerable buying of claims on location in Cobalt and Porcupine boom days, and tho the system proved profitable in a few in-stances, it has on the whole been un-stisfactory. Prospectors Prove Claims. The change is well illustrated in the Munro district. Nearly all claim purchases made since the proving of the Leyson-Dobie into the world's most spectacular gold mine were on the merits of the claims involved, with little allowed for what could not be seen. One prospector, who was telling his tale of woe at Munro, remarked, "If I had an unproved claim next to the Leyson-Dobie I couldn't sell it."

has not yet known. The determined idea of pros The determined idea of prospectors to stake mines was responsible for the discovery of Kowkash. It has this year given Northern Ontario mineral felts a greater scratching by pick and shovel than in any previous year. Sev-eral promising prospects outside of any defined district have been found. As this year's prospecting season is eral promising prospects outside or any defined district have been found. As this year's prospecting season is nearing a close these will not become generally known until next summer Fut this year's prospecting has paved the way for next year's active develop

In the second server and more than a possibilities or abandoning them.
Inter the second server and more actual prospecting.
More Real Prospecting.
More Real Prospecting.
More Real Prospecting.
There is more actual prospecting.
More Capital relieves the prospector and more actual mining development stoing on now than ever before.
The reason is simple. The prospector tor can no longar sell "wildcats" for the morth country than norther of the second the s

PICTON, Nov. 19.—Fifteen factories boarded 1095, all colored. All sold at 17 5-16c.

NAPANEE, Nov. 19.—Four hundred and ninety boxes colored and 120 white packages of checse were boarded. All sold at 17% c.

THE TORONTO WORLD

Out.

of Northern Ontario mineral wealth. Fassing cobalt's wonderful record of producing a most \$125,000,000 in silver since 1904, and the enormous dividends of mickle companies, it would be news to many to know that there are now three distinct gold districts in North-ern Ontario, where large profits are being made. The Tough-Oakes mine a' Kirk and Lake has been put on a dividend paying basis and the Leyson-7oble, representing Munro, has paid its purchase price and all other costs, sni has a large surplus. Ontario last **COBALT PREPARES**

ing for a silver production when price return to normal that will outstrip any

its purchase price and all other costs, an l has a large surplus. Ontario last year took the lead over the Yukon as Canada's greatest gold producing pro-pince. And her output of 268,942 ounces, valued at \$5,529,267 in 1914, will be left far behind and may be nore than doubled this year. Besides a greater production in Porcupine. Kirkland Lake is now adding to the total about \$75,000 a month, and the sh Leyson-Dobie, in Munro, alone pro-the dolars in gold before the end of the gear-and perhaps three millions-for it doesn't take much Leyson-Dobie ore lift previous records of the camp.

note than doubled this year. Besides a greater production in Porcupine. Kirkland Lake is now adding to the total about \$75,000 a month, and the year—and perhaps three millions—for to make a million dollars' worth.
Money Demands Investment.
"How and when is the gold boom for more than back interest." he prosphet financies to cumulated savings thruout Canada and the United States starts claming for more than back interest." he replied its and more. Farm production in Canada has been remarkably good this year, and tho few people seem to realize it, savings are increasing.
"The great activity in war stocks of Wall street and reflected in the to of warings. There is no real estimation for increasing."
"The great activity in war stocks of Wall street and reflected in the to of waining for investment or speculative soft again of one-sens able of the camp in the estimate of the savings. There is no real estimate to production in Canada. The smaller investor cannot take part in the activity in war stocks of wigh-priced securities, and with gold at a premium for years to come, it is only natural attention should be directed to mining, "Double of the subor of increasing."

IROQUOIS, Nov. 19.—At the regular meeting of the Iroquois Cheese Board, held here this afternoon, 410 cheese were boarded, 385 colored and 25 white. Price bid on board 16%c; no sales. Price bid on ourb, 17c; all sold at that price. The corresponding date last year 245 cheese boarded; price 14%c.

VICTORIAVILLE, Que., Nov. 19.-At 'he Victoriaville Cheese Board, held to-day, 400 boxes were offered. All sold at 16 9-16c.

oronto.

At the Foster. It is expected that one of the main veins in the Lawson-Baliey vein system will be encountered within the next few weeks in the long cross-cut under Glen Lake at the 210-foot level. The cross-cut is now over L.00 feet from the shaft. The Foster is now being worked under lease by the Glen Lake Cobait Mines, Lamited, of which C. B. Flynn of New York is president. Nova Scotia. Mining was started last week by the Peterson Lake Mining Company. No announcement regarding plans has yet been made. Essuer Consolidated.

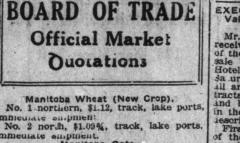

announcement regarding plans has yet been made. Beaver Consolidated. Considerable development is being car-ried on by the Beaver Mines. A station is being cut at the 1200-foot level of the main shaft, explorations being carried on at the 300, 460, 53° and 600-foot levels. The main shaft, explorations being carried on at the 300, 460, 53° and 600-foot levels. The main shaft, now down considerably over 1228 feet, will be continued to the contact with the diabase. At Munro. There are rumors of an important strike at properties in the vicinity of the Ley-son-Bobie. Nothing definite has vet been learned, as holders of properties are keeping their activities as secret as pos-sible. Operations at the Leyson-Dobie are satisfactory. A diamond drill is be-ing taken into the "rowerty. The rush into Boston Pacaud, McIlroy and Catharine Townships was intensified by the announcements of the rich strike on the McConnell-McDonough property, lot 1, con. 6, Pacaud. Purchasers of mining properties are looking over the ground carefully and reports of deals are the syndicate which murches.

NORTHWEST CAR RECEIPTS. Yest'dy. Last wk. Last y linneapolis 708 698 1253 241 351 413 th 570 lipeg 1306 PRIMARY MOVEMENT. Yest'dy. Last wk. Last yr. mining properties are looking over the ground carefully and reports of deals are constantly heard. George Miller, head of the syndicate which purchased control in the property, is visiting Boston Creek and will decide what development work will be done. The Rapp Mining, Prospecting and De-velopment Company is building a road into its main property to transport a boller, compressor and hoisting machin-ery which has been ordered. The shaft will soon reach 100 feet, and underground work will be stopped at that depth until the machinery is installed. The Tough-Oakes mine has produced this year over four hundred thousand dollars in gold. C. A. Foster, head of the company, spent the week at the mine, and everything is reported to be running smoothly. Power troubles have hamp-ered the mine, but with plenty of water now available at the power plant no further trouble is anticipated until spring. Two big air compressors are now duction. N6-20-27-D-4

It is all very well for fleshy people to admire a slim figure, but no girl likes to be referred to as "thin as a match" or "flat as an ironingboard." Thinness means that the tissues are not properly fed and nourished. It indicates a ten-

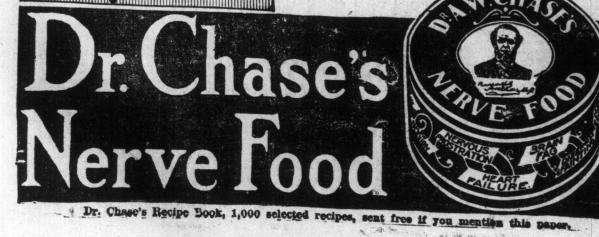

dency towards anaemia, which must be overcome in its early stages. You may eat plenty of food, but you are losing weight, and with it reserve force. The blood has got thin. and watery.

It is usually the nervously energetic girl or woman who wears herself down by worry and anxiety, until the nerves become irritable and the form emaciated.

This condition never rights itself, and for this reason you must seek external assistance, such as is found in Dr. Chase's Nerve Food. This treatment should not be confused with fatforming, oil-composed preparations. It is rather a true tonic, which sharpens the appetite, improves digestion and restores richness to the blood. Through the medium of the blood it feeds and nourishes the starved cells and tissues back to health.

Under this restorative, upbuilding treatment the angles disappear, and the form is rounded out to healthful proportions. The new tissues formed are strong and firm, and give to the body the buoyancy and vigor which makes you look well and feel well. Nervous headaches and indigestion disappear, and you feel again the joy of living. You can prove the benefit obtained by noting each week your increase in weight.
