As transportation was the primary factor necessary to development, so transportation still remains the most important thing to be done. The T. and N. O. has done and is doing good service. For 253 miles the railway winds ribbon-like thru the hills, bridging valleys and one over the level stretches of rich arable land to Cochrane, meeting the line of the National Total Porcupines531,859 \$1,141,4.8.76 Transcontinental, which itself verses the heart of the clay belt a distance of nearly one thousand miles. On the .T. and N. O. 14 passenger trains give a daily service and thru freight trains North Bay every 24 hours to carry supplies into the new country. But this is not enough. There is an urgent need for more railway construction. The line will have to be extended from Porcu-

pine to Gowganda, and eventually be An extension to James or Hudson Bay will be a primary question in the near future. Fortunately, in this respect the commission is seized with the necessity for prompt action. An exploration party is in the field, and will endeavor to discover a suitable port on James Pay. Difficulty, however, is found, owing to the presence of silt or mud, which the northern rivers have poured for centuries into the bay, and the port may be found this side of the

where the walls are very defined.

Nuggets of gold appear along the planes and even in the schist, where the contact of the schist and quartz is farmed.

As the vein runs very regular and carries defined walls, this find is resorded as one of the best made in the log trouble of the big Timmins vein on the Hollinger. The entire holdings its squares of the best made in the will pay to mill out, will average \$7\$ to the ton. This one body both will pay to mill out, will average \$7\$ to the ton. SECURITY COMPANY, LTD. (Members Dominion Stock Ex-change.) Suite 1010, Kent Bldg., Toronto, Can. ed-7

CORONATION

35c. to \$1.50

I N starting our Publicity Campaign on Porcupine Coronation, it is quite necessary to recite briefly just how the stock has acted market-wise in the past.

Less than three months ago (90 days), Porcupine Coronation was organized to take over certain valuable located Properties in the very heart of the operating centre of Porcupine. As soon as the organization was completed, a group of the prominent Toronto Brokers underwrote 200,000 shares of Coronation at a price ranging from 20, 25 and 30 cents a share, they agreeing to pool their Stock, and to sell it in small lots to their customers. Coronation was then listed upon the Standard and Dominion Exchanges. On listing the stock, 100,-000 shares were offered to the public and were over-subscribed in a few days. The market advanced from 25 cents to 41 cents

Then came the fire at Porcupine, and Coronation slumped with Hollinger, Rea, and others of the established Porcupine issues. The lowest price that the stock sold for during the slump was 25 cents. Since then, Coronation has advanced to 40 cents again, and having a perfectly natural market. Just at this point, one of the Underwriters who had placed a large block of stock, was instructed by the customer who held the stock to sell his holdings. The public, in taking up this stock, were fortunate enough to get the stock from 40 cents down to

The present market on Coronation is bid 37 cents, offered at 38 cents; and we positively assert that Coronation is now due for a steady rise, and that inside of 10 days it will score a new high level.

We have outlined briefly above the market conditions on Coronation so as to acquaint the reader with the exact facts. You can see that there has been big profit-taking in Coronation, and that traders who have bought and sold right are not sorry that they followed their brokers' advice and bought Coro-

This announcement is just the beginning of a \$10,000.00 Advertising Campaign to acquaint the public with this Porcupine issue. All of the Porcupine flotations spend large amounts of money for publicity in one form or another. Some of them have press agents who write and pay for reading notices.
Others circularize brokers and clients generally. Others

use lists. The most common form, however, is the unsigned reading notice which is sometimes deceiving to the public, as they believe that it is the unprejudiced opinion of the publisher.

The Underwriters of Coronation believe in making straightfrom-the-shoulder announcements in black and white and label from-the-shoulder announcements in black and white and label them such. They have put up large amounts of money in the promotion of Porcupine Coronation. None of the present Underwriters have made any money in the stock. They have stock to sell, but not at these figures. They are free to admit that this advertising is for the one purpose of getting stockholders all over the United States. A broad market on a stock is only obtained by a wide distribution of the shares.

To our knowledge, there has not been a Porcupine Company that has not stock for sale, with the exception of the Dome Mines. Limited, and one or two others. Even the Dome Mines.

Mines, Limited, and one or two others. Even the Dome Mines, Limited, will, we believe, one of these days increase their capitalization to probably 10 millions, and, offer the stock

To make a success of any mining venture, it must be made with the public's money. La Rose of Cobalt was once a close corporation. The public were let in later on this stock at around \$4.00, and many thousands of dollars' profit has been made in blocks were distributed all the way up. La Rose is to-day paying handsome dividends, and selling below its actual worth.

Hollinger, the banner stock of Porcupine, was underwritten

around \$3.50, and the public were invited to get aboard around \$4.50, and many thousands of dollars profit has been made in this issue in its advance to its present market of \$16.00. Porcupine Coronation is as good as the best Porcupine Stock, and is better than many of them.

We shall announce in daily advertisements just what is being done on the magnificent located properties owned by this Company. A crew of 30 men have got to accomplish something

Buy Porcupine Coronation at the market. We say unhesitatingly that, in an ordinary market, Coronation will go to 70 cents. In a Boom market (and there is a Boom market) knocking at our door). Coronation should sell for \$1.50. tand there is a Boom market For a new Map of this Property and full particulars, write
