

BATHURST CO. LTD. TO SPEND \$5,000,000 ON PLANT EXPANSION

WILL INCREASE PAPER OUTPUT TO 330 TONS DAILY, EMPLOY 1,000 OR 1,200 MORE MEN

Two Large Additions Contemplated; Second Unit for Old Plant Expected to Be Installed Next Summer, Doubling Production

VAST OUTLAY TO BENEFIT PROVINCE

Northern New Brunswick and Town Will Reap Profit From Development Program, Awaiting Legislature's Sanction of Power Dam Scheme

THE BATHURST COMPANY, LIMITED, announces further details in connection with its development at the Town of Bathurst, contingent to the passing of a bill to be introduced at the coming session of the Legislature.

At the present time the Bathurst Company has one paper machine running with a capacity of 65 tons per day. When the mill was constructed provision was made for the installation of a twin unit bringing the present mill's total capacity up to 130 tons of news-print per day.

TO ERECT LARGE BUILDING

With the additional horse-power on the Nepisiguit, the company will be in a position to undertake the development of their holdings in New Brunswick and elsewhere on a scale which will overshadow the equipment now being used.

In order to provide for this extension it will be necessary to erect a building 650 feet long by 150 feet wide. This will be on the western side of the present mill, alongside and adjoining it.

TO EXPEND \$5,000,000 The additions contemplated by the Bathurst Company will call for an expenditure of \$5,000,000, and the expenditure of such a large amount of money cannot but benefit the town of Bathurst and the surrounding country as well as the province of New Brunswick as a whole.

RAW MATERIAL BROUGHT IN With the added facilities the company is in a position to develop its holdings in the province to a greater extent. However, it may not generally be known that this company derives most of its supplies from sources outside of New Brunswick, bringing the raw material to this province to be manufactured into the finished article.

BENEFIT SOCIETY HAS ANNIVERSARY

Newfoundland Organization Presents Nice Program on 12th Birthday

The Newfoundland Mutual Benefit Society celebrated its twelfth anniversary in the city, the patent of Dr. J. M. Smith and is of the fuse type, when the temperature of the room exceeds 94 degrees or a flame strikes the fuse it melts and in doing so, closes an electric circuit which causes the alarm bell to ring.

LOCAL INVENTION

New Type of Fire Alarm is to Be Given Demonstration Tomorrow

A new type of fire-alarm has been invented in the city, the patent of Dr. J. M. Smith and is of the fuse type, when the temperature of the room exceeds 94 degrees or a flame strikes the fuse it melts and in doing so, closes an electric circuit which causes the alarm bell to ring.

TO ERECT LARGE BUILDING With the additional horse-power on the Nepisiguit, the company will be in a position to undertake the development of their holdings in New Brunswick and elsewhere on a scale which will overshadow the equipment now being used.

THE SLIGHT COLD OF TO-DAY MAY BE SYRUP TO-MORROW

On the first appearance of a cough or cold, do not neglect it, but get rid of it at once before it has a chance to grow worse and becomes settled in the lungs, for once it does become deep-seated you are going to have a lot of trouble in getting rid of it.

For Practical Affairs At the office, and for business generally, men lean to the conservative rather than the extreme. The proper suit for practical affairs should in fact carry the current style features, and emphasize none of them. It should above all things be unobtrusive, that is to say, correct in cut. Among successful men a badly cut suit is as out of place—and as noticeable—as bad manners. A correctly cut business suit is necessary for practical affairs. Our Ten-Pay-Plan permits you to buy and pay in ten weekly payments, instead of one—and at cash prices. (Men's Clothing—Second Floor.)
