INGENICA FIELDS

ARE VERY DIFFICULT

Samples of Gold Reach Vancouver-Average Run Eight Cents to Pan.

Vancouver, June 1.-A, E. Johnson the first man to visit the Ingenica gold fields in northern British Columbia, eturned to Vancouver this morning He brought samples of gold which had otained two feet below the surface. In value he had two dollars' orth of coarse gold which represented three pans, but usually the pans ran only seven or eight cents each. Mr. Johnson declares that while gold is undoubtedly to be found in large quantities, the mining conditions are very difficult. At four feet depth miners invariably encounter water, and their holes are drowned out. No-body has ever been down to bedrock. The country is flat and the streams sluggish, and there is no way of avoiding the water except by large workings which require capital.

Mr. Johnson will leave for the net diggings again just as soon as he can chinery. It may be found later that
