Capital Stock \$5,000,000

Fully paid and Non-Assessable, Divided into 5,000,000 Shares, \$1.00 per Share, Par Value

A Block of 200,000 Shares is Offered at 10 Cents per Share

Drilling Plant and Equipment Owned by the Maritime Oil and Gas Company, Limited, now busy Drilling for Oil at the Company's Property, at Lake Ainslie, Cape Breton.

F. H. STOVER.....President  
ALEXANDER G. BAILLIE.....Secretary  
J. L. MACKINNON.....Treasurer

DIRECTORS:  
F. H. STOVER, Charlottetown, P. E. I.  
ALEX. G. BAILLIE, Port Hastings.  
JOHN L. MACKINNON, Halifax.  
R. H. STERN, Charlottetown, P. E. I.  
L. H. WHEATON, Moncton, N. B.

SOLEICITORS:  
MURRAY & MACKINNON, Halifax.

PROPERTY:  
At Lake Ainslie, Cape Breton.

Cape Breton is within easy distance of the great United States ports:—  
To Portland ..... 24 hours.  
To Boston ..... 31 hours.  
To New York ..... 36 hours.

Cape Breton is the great coal producing territory.

**THE STOCK.**  
The Directors, for the purpose of carrying on drilling operations through the winter and for providing against contingencies, have authorized Mr. Alexander G. Baillie, the Trustee, to sell a block not exceeding 200,000 shares of the stock held by him as Trustee. In accordance with the resolution of the Directors, a block of 200,000 shares is now offered for sale at TEN CENTS per share.

100 shares	10.00
200 shares	20.00
300 shares	30.00
400 shares	40.00
500 shares	50.00
1,000 shares	100.00
2,000 shares	200.00
10,000 shares	1,000.00

**PROSPECTS FOR INVESTORS.**

The history of the oil business in America, from its very inception to the present date, is one continuous story of financial success. Thousands of men, formerly poor, became enormously wealthy. More money has been made out of oil than out of any industry in the world today. When oil is once struck by the Oil Company the value of the stock is increased enormously. The following is a small list of the oil companies in operation less than three years, showing the original price of their stock and the highest price it has reached:—

	Original Price.	Highest Price.
New York Oil Co. ....	\$.50	\$ 200.00
Union Oil Co. ....	1.00	1,500.00
Eldorado Oil Co. ....	.50	5.00
Kearns River Oil Co. ....	1.00	25.00
Peerless Oil Co. ....	.30	8.00
Hartford Oil Co. ....	3.00	115.00
Home Oil Co. ....	5.00	5,000.00

Contracts have been entered into on behalf of the Company, and to which the Company is a party with William Harrington, of Lake Ainslie, in the County of Inverness, dated July 9th, 1909, and Alexander G. Baillie, of Port Hastings, dated August, 1909, which contracts are on file in the office of the Registrar of Joint Stock Companies, Halifax.  
A. G. BAILLIE, Port Hastings.

**PROPERTY OF THE COMPANY.**

"The Maritime Oil and Gas Company, Limited, incorporated June 23, 1909, acquired considerable property at the organization of the Company, and since then F. H. Stover, accompanied by A. G. Baillie, secured personally many thousands of acres round Lake Ainslie, from farmers who for many years would not lease their lands until they felt satisfied that practical, experienced and successful oil men had taken hold, who meant business. In this way nearly twelve miles (with the exception of a few farms) were secured around Lake Ainslie, running back a mile and in some cases with rear lots extending their area two and three miles. The Maritime Oil and Gas Company, Limited, in acquiring this additional very valuable territory will assure every investor, in the Company, if oil is struck, a large investment for his money."

The valuable property of the Company is located at the back of the large coal measure of Inverness County. The transportation facilities are the very best, the drilling plant is only 4 1/2 miles from a railway station.

**OIL BORING AT LAKE AINSLIE.**

"The Maritime Oil and Gas Co. are making good progress with their boring at Lake Ainslie. They were down about three hundred feet on Saturday. The Company is well satisfied with the nature of the material and strata they are boring through as it is just what they expected. They do not expect to strike oil until they have reached a depth of at least fifteen hundred feet, and will be well satisfied if they locate it at even a greater depth. The splendid boring plant owned by the company is capable of boring to a depth of three thousand feet. The writer, in conversation with Mr. M. M. Pearl, the Managing Director of the Canadian Consolidated Coal Co., who had just returned from a visit to where the drill is operating, was told by this gentleman that the drill and all the machinery in connection with same was first-class, in fact, he had never seen better. As Mr. Pearl has had many years experience with drills of all kinds, he therefore knows whereof he speaks. The Stovers, who are in charge of the drill, are men of ability and large practical experience in oil regions. President Stover, Treasurer J. L. Mackinnon, and Secretary A. G. Baillie returned on Saturday from the scene of operations. They one and all speak most hopefully of the outlook. We understand the next issue of stock will be at ten cents a share. The money received from the sale of shares is being judiciously expended in prospecting and proving the property of the Company, and every dollar will be accounted for. Success to the Company. May they soon strike oil in such quantities as will make the beautiful and picturesque Lake Ainslie great and prosperous industrial centres."—Eastern Journal, Fort Hawkesbury, C. B., December 3rd, 1909.

**THE PROPERTY**

THE property of the Company consists of leases for oil and gas of almost 25,000 acres of the best oil lands in the Lake Ainslie District, County of Inverness, Cape Breton.

At the time the Company was incorporated, Mr. F. H. Stover, who is now the President and General Manager of the Company, and who is one of the best oil experts in America, examined the property, and after a thorough and searching examination his report to the Company, was as follows:—

Charlottetown, August 2nd, 1909.

To the Directors of The Maritime Oil & Gas Company, Limited:

Dear Sirs,—I beg to say that I have thoroughly examined the properties held under lease by your company for oil and gas, and as a result of the examination I beg to report:—

1st. I am familiar with the oil regions of Pennsylvania, West Virginia, Ohio and Ontario, having operated largely in these districts for the last twenty-five years.

2nd. In my opinion Lake Ainslie District shows almost exactly the same indications of oil as appeared in Oil Creek in Pennsylvania, which has been the greatest oil producing district in America. Oil Creek was the only district where oil in any quantity was to be found seeping from the rocks, and in the Lake Ainslie District the same conditions are to be found. The oil is seeping from the rocks on the shores of the Lake. The difference between the two districts is that the oil sand rock in the Lake Ainslie district is thicker, and hence more liable to be a better producing oil sand. I have taken samples of the oil as it comes from the rock, and I find that the oil is of a very high lubricating quality, and will require but little refining to make it a very valuable lubricating oil. I consider that there is no question of the existence of a very large quantity of oil and gas in this property, and the prospects of striking oil upon the Company's property are of the very best.

Yours truly, F. H. STOVER.

**REPORT OF PROGRESS AND EQUIPMENT TO DATE.**

Mr. Alexander G. Baillie, the Trustee of a certain portion of the Company's stock, was authorized to sell 500,000 shares at five cents per share. This issue has been sold out and with the proceeds the Company has erected buildings, derrick, etc., purchased a large quantity of expensive casing, a first-class drilling equipment, etc. Work was begun and drilling operations commenced in October and drilling has progressed steadily by day and night (except when delayed by accidents), up to the present time, and the well has already reached the depth of 500 feet.

The indications, as shown by the work done to date, bear out in every particular the report made by Mr. Stover. Surface oil was found in several places while drilling, and natural gas was struck at a depth of almost 500 feet. The indications are that the body of oil will be struck at a depth of about 1500 feet.

Cut out, fill in and mail the accompanying order to the Trustee, with remittance to cover the application for shares.

**APPLICATION FOR SHARES.**

Sir,—I desire to purchase ..... shares of the stock of The Maritime Oil and Gas Company, Limited, at the rate of 10 cents per share (par value one dollar), the same to be issued fully paid up and non-assessable. I am handing you herewith ..... dollars in ..... payment for same.

Name .....

Address .....

To Alexander G. Baillie, Trustee, Port Hastings, Cape Breton.

No order for less than 100 shares accepted.

ALEX. G. BAILLIE, Trustee, Port Hastings, Cape Breton.
