

Prof. T. F. McIlwraith, Speaker at Founders' Day Celebration

A colourful academic procession marked the opening of the annual Founder's Day celebration, held in the Memorial Hall, Monday evening, February 19. Included in the program, which commemorated the granting of the first charter to the College of New Brunswick in 1800, was the annual quit-rent payment, a presentation of the "Story of U. N. B.", and an address delivered by Prof. T. F. McIlwraith, M.A., F.R.S.C.

The relationship of cultural differences to inter-societal frictions was the theme of the address delivered by Professor McIlwraith, who is Head of the Department of Anthropology at the University of Toronto, and Associate Director of the Royal Ontario Museum.

On behalf of His Majesty, New Brunswick's Lieutenant Governor, Hon. D. L. MacLaren received the traditional quit-rent from President A. W. Trueman in a solemn ceremony.

The original land grant to the College of New Brunswick in July, 1800, provided that a "yearly quit-rent of one Farthing for every hundred acres hereby granted . . . be paid 'yearly thereafter forever.' This annual payment has been continued and each Founder's Day, the Crown receives its ancient due.

Introduced by Dr. Trueman, Professor McIlwraith prefaced his address by expressing regret at the absence of Dr. A. G. Bailey, Dean

of Arts, who was unable to be present due to illness. Prof. McIlwraith lauded Dr. Bailey's writings saying that they are an important contribution to the field of anthropology.

Prof. McIlwraith said that as an anthropologist he was more interested in studying living cultures and races than those which are dead. He emphasized that it is cultural rather than racial differences which are the bases of frictions between societies, showing by examples from history that these cultural differences have been and are still the major determinant.

The audience of students, faculty and senate members, and friends of the University were given the opportunity to hear a recorded presentation of "The Story of U. N. B." the first program prepared by University Radio Productions. This radio drama was written by Albert Tunis, Prof. of Sociology, and was produced by Mr. Alvin Shaw. The original broadcast was made on December 6, 1950, over Radio Station CFNB, and was the first in a series of radio programs completely written and produced by the faculty and students of the University.

U. N. B.'s historical drama, "The Story of U. N. B." took the place of a faculty playlette and was very well received.

The Founder's Day celebration, designed to commemorate the transforming of the Fredericton Academy of Liberal Arts and Sciences into the College of New Brunswick, on February 12, 1800, was held in honour of "those who with faith and vision plotted our course a century and a half ago.

Exhibits Highlight Engineers' Formal

The engineers present their biggest social effort of the year next Friday evening at the Lord Beaverbrook Hotel in the form of their annual Engineers' Formal. The Ball, long established as one of the leading social events of the year will feature the music of the Criterion and a variety of engineering exhibits from all three faculties.

At press time only the Electrical Faculty was able to supply a description of its proposed exhibits. The main exhibit will be a "sex analyser" — a marvel in engineering achievement which will determine the sex of any person which utters a word or two in its "ear". An artificial and model transmission line and a television receiver built and designed for and by Canadians will also be included among

Wassail Tonight

Tonight, at the Alex Canteen, the engineers will hold their annual Wassail. Beginning with a lunch, probably followed by a few words from the faculty guests, the event is expected to develop along the lines of the Stag Party held at the same location last fall.

Social Committee head A. Ross "Punchy" Walker plans to have lunch begun at approximately 6:30 p.m. Refreshments will be served. It is difficult to estimate the time at which the event will end.

Intramural

Clark per usual while Joe Church was top man for the winners with 11 counters. The Residence B team needed a win over the Arts science squad in order to tie the Faculty for the top spot in the section. The Residence B boys left no doubt as to their superiority as they swamped the Arts science 46-28 in a very ragged game. Ben Baldwin led the winners with 20 points while Al Nakash followed with 17 counters. In the other A section game the Foresters edged past the Residence A team by a 38-33 count. Bob McLaggan led the Foresters with 16 points and Stu Vaudry was top man for the Residence scoring 14 counters.

Silver Streaks

and and Morris who each scored twice while the other counter was scored by Tompkins. For the losers Risteen and McBeth each scored once.

Last term's playoffs were won by the Intermediate Foresters who defeated the Silver Streaks in the finals by a 7-4 count. This term the Streaks seemed to have had a little the better of the Foresters, not only in beating them out for the league leadership but also in defeating them in the single encounter of the two teams. If neither of these teams are upset on their way to the finals of the playoffs, the contest between them should prove to be a thrilling one.

the exhibits.

With the sale of tickets progressing favorably it is expected that a large if not record crowd will attend the affair. Contrary to popular opinion the dance is not exclusive. Any and all students are welcome proclaims the Social Committee.

The JOE KAISER Memorial Loan Fund for Engineers

Students in the engineering faculties will be canvassed for donations and pledges to this fund, the purpose of which is defined herewith.

This fund, which is being organized by students of the class of '52, is for the purpose of helping to finance a deserving student during his third year. The amount of the loan will be one hundred dollars, repayable interest free within two years after graduation.

Following are members of the selection committee:

- The Dean of Civil Engineering.
- The Dean of Electrical Engineering.
- The President of the Engineering Society.
- The Secretary-Treasurer of the Engineering Society.

Applications will be made on or before December 1st and awarded as a credit towards tuition for the second semester. Selection will be made as to need.

The support of all engineering students is solicited.

THE FINANCIAL ASSISTANCE PLAN OF THE DEFENCE RESEARCH BOARD FOR 1951-52

The Defence Research Board is now accepting applications for financial assistance from high ranking Canadian students registered in Science or Engineering, who will graduate from University in 1952, preferably at the Master's or Ph D Levels.

The conditions of acceptance will be the same as for 1950-51, but the monthly payment will be \$162.00. Application forms may be obtained from the Registrar or Placement Officer.

Apply to: The Director of Research Personnel,
Defence Research Board,
Department of National Defence,
"A" Building, Ottawa, Ontario.
