

	PAGE.
<i>Manufacture of Briquettes Without Air Drying the Peat.</i>	157-170
Drying by Pressure.	157
Drying by Heat.	157
Kerrinne's Method of Drying Peat by Means of Electric Energy.	157-159
Electro Peat Coal.	159-160
The Ekenberg Wet Carbonizing Process.	160-170

CHAPTER V.

PEAT POWDER.	171-172
----------------------	---------

CHAPTER VI.

PEAT COKE.	173-190
<i>Coking in Heaps.</i>	173
<i>Coking in Ovens.</i>	173-176
The Hahnemann Oven.	173-174
The Wagenmann Oven.	174-175
The Lottmann Oven.	175-176
<i>M. Ziegler's Peat Coking Process.</i>	176-188
The Oldenburg Plant.	179-181
The Redkino Plant.	181-183
The Beuerberg Plant.	183-185
<i>Bamme's Peat Coking Oven.</i>	188
<i>The Sahlstrom Process.</i>	188-189
<i>Sehönig & Fritz Process.</i>	189-190

CHAPTER VII.

USES OF PEAT FUEL FOR HEATING, STEAM RAISING AND POWER PURPOSES.	191-229
<i>For Domestic Purposes.</i>	191-192
FOR STEAM RAISING.	192-200
I. <i>Plane Grates.</i>	192-193
Air Dried Peat as Locomotive Fuel.	193-194
II. <i>Step Grates.</i>	195-196
III. <i>Half Gas Furnaces</i>	197-198
IV. <i>Peat Powder.</i>	198-200
