A great help on a busy day

ONCE a week at least there is a big day centering around the kitchen range. The boiler takes up a lot of room, and there is the dinner to cook—because no woman wants to serve "wash-day dinners."

The range should take care of both the dinner and the washing. And if you have a Pandora, it will.

Set the boiler on the long way of the Pandora—not on top, but right down in the pot holes. That leaves two of the hot front

holes free for cooking, and at the same time keeps the boiler on the boil. Should you have to add coal to the fire, you can do so without taking off the lids or disturbing your cooking.

This is the sort of range every woman should have—one that saves her time on busy days. It is almost as important as the saving of coal, for which the Pandora is famous.

McClary's Pandora Range

Before you invest in a new range investigate the Pandora. If you would like to know why the Pandora gives a lifetime of perfect service, why it saves coal, why it saves time, we will be glad to place the reasons clearly explained in your hands. The Pandora has a glass oven door, a white enamel removable reservoir, wonderfully smooth working grates, and dozens of features that are illustrated in our new booklet, "The Magic of the Pandora." You may secure one by mailing the coupon to the factory.
