**TWO VALUABLE  
IMPROVED FARMS FOR SALE  
VERY CHEAP.**

S. W. 1, Sec. 4, T. 15, R. 28. On this place is located the DeClare P. O. A small general store is run in connection. No other store nearer than sixteen miles. A nice little business has been done for the past ten years, and it could be much increased. Thirty-six acres cultivated; 100 fenced with wire. Never-failing supply of excellent water close to buildings. Abundance of timber only four miles off. A good frame house. Stabling for forty-five head of stock (one of the stables is of stone, 30x30 ft.). Large granaries. Convenient to school, and it is only two and a-half miles from the last surveyed line of the G. N. W. C. Ry. Sixteen miles from Fleming Station, C. P. R. A first-class farm for mixed farming. The balance could nearly all be plowed. The stock of goods in the store will be sold with the farm if desired, and purchaser could secure the appointment of P. M., if qualified for the position. Also S. W. 1, Sec. 9, T. 15, R. 28, a half-mile from above. On this there are eighty acres under a high state of cultivation. It is one of the best grain farms in this district. The whole will be sold together or separate to suit. Apply to

**— THE —****Best White Oat**

IN THE WORLD.

JOHN SHARPE & SON'S

ROYAL DONCASTER

This magnificent White Oat was introduced by Messrs. John Sharpe & Son in 1892, and has given the greatest satisfaction at home and abroad. It surpasses all others for earliness, while its productiveness may be realized from the fact that on several farms last season it yielded 12 to 14 quarters (96 to 112 bushels) per acre. The straw is frequently 6 feet to 6 feet 4 inches in height; of splendid quality; large, close panicle, completely clothed with grain of the finest quality, and very hardy. It has a wonderfully thin skin, and is consequently much appreciated by breeders of pure-bred stock.

From Wm. Saunders, Department of Agriculture, Ottawa (to whom we shipped a quantity last season)—"I find Royal Doncaster Oat is much thinner in the skin than any of the oats we have been growing. From its appearance and character it will be a valuable addition to the varieties we have now in this country."

PRICE, 8s. PER BUSHEL, FREE AT LONDON OR LIVERPOOL.

**A Bright Lad,**

Ten years of age, but who declines to give his name to the public, makes this authorized, confidential statement to us:

"When I was one year old, my mamma died of consumption. The doctor said that I, too, would soon die, and all our neighbors thought that even if I did not die, I would never be able to walk, because I was so weak and puny. A gathering formed and broke under my arm. I hurt my finger and it gathered and threw out pieces of bone. If I hurt myself so as to break the skin, it was sure to become a running sore. I had to take lots of medicine, but nothing has done me so much good as Ayer's Sarsaparilla. It has made me well and strong."—T. D. M., Norcatur, Kans.

**NOTICES.**

C. W. Paris writes us that, "Having read Mrs. Jones' book, 'Dairying for Profit,' I think every farmer who has any cows should send and get a copy. They will never regret it, and so cheaply to be had."

We wish to call attention to a peculiar typographical error which occurred last issue in the advertisement of the Waterous Company's Portable Sawmill. This advertisement read, "Can be run by 6 to 12 horsepowers of water, wind or steam." This clause should have read, "Six to twelve horsepower, water, wind or steam."

TO FRUIT GROWERS.  
The attention of our readers is called to the advertisement of the Blymyer Iron Works Co., of Cincinnati, Ohio, which appears in this issue. Their Zimmerman Evaporators for Fruits and Vegetables have for many years been looked upon as the Standard Machines. Parties in want of Evaporating machinery will do well to write for their catalogue.

PURE SOAP.  
The Wanzel Pure Soap Company, Hamilton, Ont., are manufacturers of pure soaps for laundry and bath use. All the oils and materials used are absolutely pure, sweet and healthful. No cheap adulterations to add weight are used. We have tested the goods offered by this firm and find them very superior.

THE WORTMAN & WARD SPADE HARROW.  
Among the many useful things manufactured by The Wortman & Ward Manufacturing Co. London, Ontario, is The Wortman & Ward Spade Harrow; this implement does its work in a very thorough manner. Among all the devices for tilling the land few, if any, equal this implement, and certainly none surpass it. At this price at which it is sold every good farmer should own and use one.

We wish to call the attention of our readers to the advertisement of hay and grain caps which are manufactured by the Symmes Hay Cap Co., Sawyerville, Que. Farmers have long felt the need of a hay cap which would be waterproof, durable, convenient, not liable to be blown off by storms, and, at the same time, be offered at a reasonable price. This cap, from the description and recommendations, appears to fill the bill exactly.

GREASE-HEEL OR SCRATCHES.  
Physic your horse well with Dick's Blood Purifier; feed on soft, cooling food. Keep him clean, and dry and he will recover in time. Washing with castile soap and warm water will be useful if the legs are carefully but gently rubbed after each washing. Do not use bandages. What is most desirable is to keep his skin dry and his blood thoroughly cooled. It may take some time to get rid of the fever and impurities in the blood that have caused the trouble, but Dick's Blood Purifier will accomplish it if used as directed.

CALIFORNIA HEARD FROM.  
A remedy which can be used instead of the firing iron is one of inestimable benefit to the horsemen of the country. Actual cautery or firing, no matter how skillfully the operation may be performed, will leave a blemish, and in many cases affects the sale and deteriorates the price of the horse. In this respect, Gombault's Caustic Balsam is invaluable, and is a preparation used and endorsed by the best veterinarians. It is also a cure for ailments of the muscles, glands, tendons and skins of horses and cattle, and will be found exceedingly useful to the human being as a relief for rheumatism, sprains, etc. Every owner of a horse should have on hand a supply of this great veterinary preparation. The American agents are the Lawrence Williams Co., Toronto, Ont. Breeders and Sp., May 30, 1891.

A flock cannot thrive if infested with insects, nor can it yield a good fleece. For a small sum the flock can be cleaned and kept clean, and the lustre and growth of the wool enhanced, by dipping in a preparation of good repute. The Cooper Sheep Dip advertised in our columns is famous the world over, and is giving the greatest satisfaction wherever introduced. Its advantages appear to be:—Its use with cold water, non-dissolution to the wool, freedom from strong scent, while being cheap and effective. Annual dipping is a wholesome custom resorted to in the older sheep producing countries, and is fast coming into vogue on this continent. The Cooper Dip has been in use 50 years, and is now used on one hundred millions of sheep annually, the best possible proof of its sterling quality. Cooper & Nephews, Galveston, Texas, mail their "Guide to Dipping" free to all applicants.

LUCK IN SEEDS.  
"I didn't have very good luck with my seeds last year," a farmer was heard to say. This gives rise to the question: How many poor crops can be attributed to "luck" in the selection of seeds? Buying seeds is an important factor in farming, and should receive the careful judgment and consideration of the farmer. It is almost always impossible to distinguish the good from the bad in seeds by sight, and the only infallible guide for the planter is the reliability of the seedsmen. D. M. Ferry & Co., of Windsor, Ont., have for many years been the leading seed house of this country, and their reliability is unquestioned. They issue a book annually which contains a complete digest of the very latest gardening knowledge by the best authorities. The 1893 edition is handsomely illustrated and contains information about the selection and planting of seeds which will prove of the greatest value to every one planting a garden or farm. It is mailed free to any one making application to the firm's address.

A DEHORNING DEVICE.  
S. S. Kimball, 577 Craig street, Montreal, P. Q., offers for sale in this issue Dr. W. H. Leavitt's Dehorning Clipper. This instrument is made in three sizes—one small, to be used when operating on calves, the other larger, suitable for cutting the horns of young cattle or milch cows, the third size will cut off any horn that grows on a bovine, large or small. These instruments are made of the best steel, and do the work quicker and better than a saw; does not crush the bone, but leaves it smooth and the wound in just the right condition to heal quickly. This device is recommended by the highest authorities, including Prof. J. P. Roberts, of Cornell University, N. Y. We advise our readers to write Mr. Kimball for full particulars and pamphlets, which give directions for the use of this tool, and also tells how to dehorn and how to place the animal so as to operate in the easiest and best way.
