

There's a profit side as well as a pleasure side in the use of a

KODAK ON THE FARM

Pictures of stock that you have to sell, pictures showing the development of animals at a certain age, of crops at a certain stage of growth, of buildings, and of ditches and fences and roads—all these can be used to advantage in systematizing and making your farm profitable.

Pictures of your family and friends, pictures of the places you visit and the things you and your family are interested in—these will add to the pleasure of home life for all the household.

And you can make such pictures.

The operation of a Kodak requires no technical knowledge. The little book that accompanies each camera tells how to take the pictures, how to develop the negatives and how to make the prints, all in a simple way that the beginner can easily understand. And by the Kodak system there's *no dark-room* for any part of the work.

Ask your dealer, or write us for illustrated Kodak catalogue—free by mail.

CANADIAN KODAK CO., Limited, TORONTO, CAN.

YOU GET ALL THE CREAM

from your milk only when your separator runs freely and smoothly. This depends as much upon the oil you use to lubricate the separator as upon the separator itself.

STANDARD HAND SEPARATOR OIL

is the one oil you can depend upon to keep your separator in the best running condition.

Standard Hand Separator Oil feeds freely into the closest bearings. It also has just the consistency or "body" needed to reduce friction between the delicately balanced parts to the lowest possible point.

Standard Hand Separator Oil never gums, never rusts, never corrodes. Your separator will pay better and last longer if you use it.

Ask your dealer for **Standard Hand Separator Oil**.
One gallon cans.

DE LAVAL CREAM SEPARATOR

NEW AUTOMATIC OILING

The most important Cream Separator improvement since the introduction of the present type of De Laval machines.

The new automatic oiling De Laval Cream Separators are now being supplied in all sizes, and this improvement constitutes another great step forward in cream separator construction—the one thing possible in betterment of the previous De Laval machines of the present type.

The new system of De Laval automatic oiling is distinctively different from any other splash or spray system in that there is a constant regulated feed of fresh oil and discharge of used oil. Other splash systems use the same oil over and over, until it soon does more harm than good.

In the new automatically oiled De Laval machines all gears, shafts and bearings practically float in a mist-like spray of oil, and literally never touch each other during their operation.

De Laval agents will be glad to exhibit the new machines and demonstrate the working of the new automatic oiling system, which more than ever enhances De Laval superiority in every feature of cream separator practicability.

Cleanliness is next to godliness

That's why our Fibreware, Butter Tubs, Pails and Wash Tubs are so popular.

They are so easily kept clean, outlive many times ordinary Woodenware and are so tight, that once used always used.
