REAP A LUMBER CROP

Why not take a crop of lumber off the farm this winter? It's there, in your wood lot—and in your neighbors'—waiting to be harvested. You have the time, the team and the engine. All you need buy is an inexpensive "American" Saw Mill. You can run it yourself, and make good lumber for a new house, a new barn, or for the market. Lumber prices are high. Good lumber is in demand. There's big profit in working wood lot timber with an "American" Mill because it does so much at so little cost. An 8 H. P. engine will cut up to 2500 feet a day. When you've cleared your wood lot, go to your neighbor. Say his lumber for him and share his profits. You ought to know all about this farm lumbering business. Ask us for our new book No. 33—the book that tells. Write nearest office now, while interested.

DE LAVAL CREAM SEPARATORS

There's no good reason why you should wait till spring before getting one

On the contrary you may buy a DE LAVAL NOW and save half its cost by spring. Moreover, if you can't conveniently pay cash you can buy a DE LAVAL machine on such liberal terms that it will actually pay for itself.

As to your NEED of a separator, if you have the milk of even a single cow to cream you are wasting quantity and quality of product every day you go without one. This waste is usually greatest in cold weather and with cows old in lactation, and it counts most, of course, when butter prices are high. Then with a separator there is always the sweet warm skim milk, and saving of time and labor, in addition.

When it comes to a choice of separators DE LAVAL superiority is now universally recognised. Those who "know" buy the DE LAVAL to begin with. Those who don't "know" replace their other separator with a DE LAVAL later—thousands of users do that every year. If you already have some other machine the sooner you exchange it for a DE LAVAL the better.

Why not start 1913 right in dairying? SEE and TRY a DE LAVAL NOW when you have plenty of time to investigate thoroughly. The nearest DE LAVAL agent will be glad to set up a machine for you and give you a free trial of it.

BOLINDERS SEMI-DIESEL CRUDE OIL ENGINE

This handy little tool will save you hundreds of dollars. Not alone in replacing labour but in upkeep and running cost as compared with Gasoline engines. A 12 H.-P. Gasoline Engine costs you 30 cents to operate per hour. Our Crude Oil Engine only costs 6 cents per hour. Our engines are designed and built to stand hard work. They will outlive three or four gasoline engines. There is absolutely no risk from fire or explosion as it uses non-inflammable crude oil.
