

What Three Bushels More to the Acre Means

EIGHT years ago the farmers in a central state raised average crops that ran three bushels less to the acre than they now get. Suppose each acre of farm land in this country were so tilled that it produced an equal increase. How much more money would farmers have, with which to buy the luxuries of life that they earn and deserve?

What others have done, you can do. Your share in this prosperity depends entirely upon yourself. The first step for you to take is to fertilize your land properly with manure spread by an

I H C Manure Spreader Corn King or Cloverleaf

Manure cannot be spread as it should be unless a machine is used. An I H C spreader covers the ground with an even coat, light or heavy as may be needed, and pulverized so that the plant food elements in the manure combine with the soil to best advantage.

The spreader that does this work as it should be done must have many excellent mechanical features. The apron should move without jerking; the beater should meet the load at exactly the right point to pulverize the manure without too greatly increasing the draft of the machine; the speed changes of the apron should be positive whether the spreader is going uphill or down, otherwise the spreading will be uneven. All these features are provided for in the construction of I H C spreaders.

The I H C local agent carries in stock the machines best suited to your locality. See him for catalogues and full information, or, write the nearest branch house.

International Harvester Company of Canada, Ltd
BRANCH HOUSES

At Brandon, Calgary, Edmonton, Estevan, Hamilton, Lethbridge, London, Montreal, N. Battleford, Ottawa, Quebec, Regina, Saskatoon, St. John, Winnipeg, Yorkton.

Full particulars from any C.P.R. Agent or write M. G. Murphy, District Passenger Agent, Toronto

We give a FREE TRIAL of the

Domo Cream Separator

Think of it! We send this high-grade, easy-turning machine on approval, freight prepaid, to test at our expense. We take all the risk. Prices from \$15 and upwards, about half what you pay for others, and you can be the judge of its merit. Write to-day for circular "A," which gives full particulars of our trial offer, with prices and easy terms of payment. It's FREE.

DOMO SEPARATOR CO.

Brighton, Ont.

St. Hyacinthe, Que.

Sizes 2½ to 60 h.p. Semi-portable, as illustrated; also stationary and portable.

"That's the slickest engine I ever saw"

So remarked an agent who has handled many different makes of gasoline engines in the last twenty years. "Why," he said, "that special governor of yours would make any man want the

Renfrew Standard

gasoline engine if he had no other reason for buying it."

The governor that the agent spoke so enthusiastically about is, we might say, one of the principal features of the Renfrew-Standard engine. It is undoubtedly the most efficient governor yet devised—immensely superior to the old fly-wheel type. It controls the engine perfectly, allowing speed to be changed at will while engine is running, and automatically cutting off the supply of gasoline and electricity from batteries should engine exceed speed for which it is set. The simplicity and durability of this governor also makes the Renfrew-Standard engine especially adapted to withstand rough usage.

Other special features of the Renfrew-Standard are told about in our engine booklet. Send for a copy and learn what they are.

The Renfrew Machinery Company, Limited

Head Office and Works: RENFREW, ONTARIO

Sales Branches at Winnipeg, Man., and Sussex N. B.

If you want a little engine, write us about the Gifford 1½ h. p. This is, we believe, the most effective and reliable little engine made.

The Improved "Ideal" Farm and Stock Gates

Possess Features That No Other Gates Have

Should the BRACE WIRE in an ordinary gate become slackened or broken, you know from experience that it cannot be tightened or replaced so as to make the gate as serviceable as when you bought it.

OUR PATENT HINGE-CLIP

with attached BRACE TIGHTENER overcomes this disadvantage. In "IDEAL" GATES the brace wire can be adjusted or replaced in less than two minutes with an ordinary wrench and then you practically have a new gate. Our new Hinge Clip also carries the weight of the gate direct from the top hinge bolt, thus relieving the frame from any unnecessary strain.

OUR PATENT LATCH

is supplied with all "IDEAL" GATES. It is positive and can be opened either way. Raise the thumb latch and push the gate open; when through, swing it shut—it always latches.

These new features are all covered by patents and "IDEAL" GATES are the only gates sold in Canada with these improvements, which makes the gate more serviceable and add many years to its life. A postal card will bring you our catalogue 121 which describes in detail the many advantages of "IDEAL" GATES.
