FENCE TALK No. 2

Find out beforehand the strength difference between Page Wire Fences and other kinds. Needn't buy blindfold any more. Test for yourself—this way:

Make the dealer give you a foot-long piece of the horizontal wire from the other kind of fence—and a piece from a Page Fence.

Heat both pieces cherry-red. Drop them in cold water. And then—

Try to bend them—both of them.

The Page wire will be found to have taken such a temper that it will cut glass. The other wire will bend like sheet-tin and easier.

That test proves Page wire to be "high-carbon" wire that will take a temper—which simply means it is high class—lots of steel in it—hence far greater strength, toughness, power to stand strain and stand up.

And that test also proves other fence-wire to be merely, "hard drawn" that softens if you try to temper it. Such wire must stretch too much in service—must make only saggy fences—must give out in short order.

Make the test first; you'll see then why the cent or two more Page Wire Fence costs per rod is a great investment—because it gets you a fence that will outlast other kinds two-to-one—because Page Fence is fully a third stronger than the others. And you will see, too, that this great strength makes it possible to stretch Page Fence tighter—and to use fewer posts to hold it tight. The saving in posts figures 5 to 8 cents a rod—and yet the Page Fence will be a stauncher fence.

Let us send you a booklet that proves why Page Fences wear best and tells how you can prove fence-quality before you buy it. Get the Booklet from the nearest place of the Page Wire Fence Co., Ltd., Walkerville, Toronto, Montreal, St. John, Vancouver, Victoria.
