In the stranger's assertion is there not food for thought? As he drove down the hot, dusty, country road with his load of old iron and rags, this 'stranger within our gates' had left us a thought as burning as the rays of the summer sun, the thought that the farming industry must be protected and managed in such a way as to ensure food for our people and our armies and at the same time to encourage and safeguard the farmers, the tillers of the soil.
