THE SPOILS CRY

The Conservative press is claiming great credit for Premier Borden in allowing the partisan axe to be manipulated on the official head of his uncle, who is a Liberal, as are most of his relatives. There are two ways the invasion of even his family circle by the gang of head hunters he is with.-Strafford Beacon (Liberal).

The above is characteristic of many is equally certain.

Any man in Canada who accepts a questionably demonstrated in court. Government position should cease active participation in politics. If he doesn't his head should go off, no matter whether he is a Grit or Tory or has any relatives in Parliament. Dismissals for cause take place in connection with every line of employment, and very properly so, too.

Government officials who have had enough sense of the fitness of things to refrain from taking a share in the party warfare have not been touched, or even threatened. Take Brantford as an example. Not one Liberal, as such, has been removed from the publie departments here; to the direct contrary, more than one has had his salary raised since the advent of the Conservative administration.

The Stratford Beacon and other Liberal sheets may shriek as much as they please, but that sort of thing will not fool the public.

HUGHES' DIFFERENCE WITH THE BRITISH WAR OFFICE

The progressive administration of Col. the Hon. Sam Hughes in the Militia Department of Canada is the object of appreciation not only from his own party, but also from the Opposition. The Minister of Militia always has believed in looking after the interests of Canadians, and while not prating about 'autonomy" and "fleet units," yet has always managed to see that things Canadian secure proper consideration and respect.

Nowhere has this been more evident than in the recent negotiations with the British War Office and National Rifle Association with regard to the exclusion from certain competitions at Bisley of rifles not equipped with the aperture sight. The result of these limitations would be to prevent Canadian riflemen from compet ing at Bisley, where they have been going for many years with great success. Every year men who win their places at the Dominion Rifle competitions at Ottawa are selected to represent Canada in the Bisley competitions, and the result has been a great increase of interest in rifle shooting in bought six years ago next May, and Canada during the past ten years.

"Joe Garson, Chicago Red and Dacey, along with Griggs, broke into Edward Gilder's house last night. I knew the trick was going to be pulled off, and so I planted Cassidy and a couple of other men just outside the room where the haul was to be made. Then I went away, and after something like half an hour I came back to make the arrests myself. When I broke into the room found young Gilder alone with that Turner woman he married, and they were just talking together.

"I found Griggs lying on the floorlead! The Turner woman says young Gilder shot Griggs because he broke into the house. Ain't that the limit?" "What does the boy say?"

"Nothing. We've got Chicago Red and Dacey, and we'll have Garson before the day's over. And, oh, yes! They've picked up a young girl at the Turner woman's place. And we've got one real clew-for once!" He opened a drawer of the desk and took out Garson's pistol, to which the silencer was

still attached. "You never saw a gun_like that before, eh?" he exclaimed. Demarest ad-

mitted the fact. "I'll bet you never did! That thing on the end is a Maxim silencer. There are thousands of them in use on rifles, but they've never been able to use them on revolvers before. That thing is absolutely noiseless. I've tried it. Well, you see, it'll be an easy thingasiest thing in the world!-to trace that silencer attachment. Cassidy's working on that end of the thing now!"
