considerable list of jute cloths, yarns used for the manufacture socks and stockings, etc.

Wheat and Flour.

Taking up the question of the duty upon wheat and lour, Mr. White said "A matter which engaged during Government has been the so-called question of free wheat, which has been so much under discussion in

States, which came into effect on October 3, 1913, provides by item 644 that wheat, wheat flour, and semolina and other wheat products shall be entered free of duty from countries which do not impose a duty on wheat of wheat flour or se nolina imported from the United and upon wheat to per cent ad vaiorum. It is clear therefore that Canada should place wheat, wheat flour and semolina on the free list our wheat and wheat products would be again free entry to the markets of the United States."

The Different Views

The minister then proceeded to set orth the views of those favorable and those opposed to Canada acceptwheat and placed the reasons before the government and the country.

Speaking generally, said Mr White t was not advisable that a nation's ther nations. In addition, Canada was engaged in great railroad enterprices to facilitate marketing her products. Under these circumstances it was felt that so great a change should not be made until the country was more certain as to the outcome of its railway development and the result to Western grain growe's of the opening of the competitive routes afforded by the Hudson Bay Railway and Panama Canal.

"It is surely the part of wisdom," said Mr White, "to await the outcome of these developments rather than to take a step now which might tems through the diversion of traffic will. to routes other than Canada. In the ion in the West and the supreme and rital necessity that the net price of his grain to the farmer should be as high as circumstances will permit the government will continue to devote itself to the solution of the juestion of freight rates, of elevator mpanies and other agencies whose ggregate of charges take under potical considerations such a formidble toll from the price at which the he product of the Western grain ields sells on the world market at

Liverpool." Increase Duties.

The Government had therefore deided to take authority by order-inouncil to increase the duty on all nill products up to 120 pounds per ineal yard to the \$4.2g, \$6 and \$7.00 ates per ton. The minister then announced that

he Government had acquiesced on representations made by the steel companies that wire rods, which were now on the free list, should receive a moderate amount of protection. There were, he said, large milis at Hamilton and Sydney, which were only in partial operation. The proposal to increase duty on wire rods had been proposed by nail makers, other than these two big companies

farm fences. n the existing drawback on imported ers, reapers, binders and mowers ig iron which is used in the manu- could stand a reduction from the facture of articles for export. There present tariff of 17 1-2 to 12 1-2 per was a technical provision which cent. (Conservative cheers). would be clarified by a resolution to This reduction, Mr. White pointed be provided.

The minister also announced that charcoal for pig iron production would be put on the free list, the same as coke is at present, but it was further proposed that bituminous coal when imported for the purpose of manufacturing coke for smelting and foundry use, should be allowed a drawback of 99 per cent of the duty.

Mr. White said that under the present tariff wrought or seamless iron or steel tubing over four inches in di ameter, was subject to a duty of 10 per cent. British preference, 12 1-2 the year the careful attention of the per cent. intermediate and 15 per cent general. Tubing four inches or less in diameter was subject to rates of 20, 30 and 35 per cent., respectively. He proposed to increase the West and throughout Canada. the duty of these latter figures on all The Underwood tariff of the United tubing up to 10 inches in diameter. The 99 per cent. granted in drawback on imported tubing has been changed to 55 per cent.

The question of duty on agricultural implements, to which great interest is attached, come next. Mr. White said that all governments in Canada had recognized the importance of fixing duties on agricultural implements wheat is fixed at 10 cents per bushel as reasonable as possible having reportant that the implements of the farmers should cost them as little as possible. The average rate of duty to-day on agricultural implements was 17 1-2 and 20 per cent.

Referring to the resolution previously moved by Mr. Knowles o -oosejaw, for free agricultural imple ments, Mr. White asked what would be the position of the manufacture of agricultural implements if the duty ing the United States offer. It was was entirely abolished. He pointed claimed that 'free wheat' would mean out that he paid duty on the materia higher prices and better shipping fa- which went into his factories at rates cilities for Western farmers. The ranging from 20 to 30 per cent, Were milling interests had opposed free they prepared to take a further step and abolish the duties upon all products entering into the manufacture of such implements. The value of the finished product was \$20,700.000 per year. There were no less than 54 manufacturing plants in Ontario in 43 places and distributed in 35 electoral districts. The adoption of a policy of free agricultural implements as advocated by the Liberals, would undoubtedly destroy the industry. The government had approached the subject in a rational way, had made investigations for over a year into factory cost and output and have examined the balance sheets of manufacturers to see

what were their profits. Mr White then announced that as a result of the inquiry made he had de-pension Bridge, N.Y., and Detroit, Mich. sided that the duties could be changed on only one class of agricultural im- G. C. MARTIN, H. C. THOMAS, plements without disturbing the industry. This class included harvesters, reapers, binders and mowers, and were manufactured by four Ontario firms. The Massey-Harris Co., Toronto; the International Harvester Co. of Hamilton; Frost and Wood Smith's Falls and the Noxon Co., o Ingersoll. There were a couple of points of differentiation whereby the manufacturers of those agricultural implements have an advantage over the makers of other implements.
