A PLEA FOR QUEEN'S.

Rev. Logie Macdonnell Has a Word
For General Assembly.

To the Editor of the Times:

Sir,—The General Assembly of the Presbyterian Church is to meet in your city within the next few days. In view of the fact that a very small number of the ministers from British Columbia will be able to attend the Assembly, owing to the expense of travelling, I feel the liberty of asking the use of your columns to bring one matter to the notice of all the members of the Assembly, in which a good many of us are interested.

The Assembly will be asked by the trustees of Queen's University to assent to the removal from the charter of such denominational restrictions as might impede the development of the University. The words of the request would seem to imply that in the past denominational restrictions have impeded the development of the University. No one still familiar with the history of Queen's during the last twenty years could possibly form any such conclusion. It is quite true that Queen's has made hosts of friends outside the Presbyterian Church. She has graduates and admirers of all creeds. Would she have a single friend more if she had never had Presbyterian connection? Is there any evidence that sympathy, enthusiasm or support would become stronger if Presbyterian connection were severed?

But the point of vital importance to notice is that while there are many non-Presbyterians who admire Queen's and are willing to give her some financial support, the strength of the University has always consisted in the fact that she has a strong Presbyterian constituency behind her. The sympathy of Presbyterians has been the one never-failing source of supply. It may be argued that a university can't live on sympathies; that it needs money. Presbyterian sympathy has always meant money, not as much, certainly, as the University could profitably use, but still enough to make the University authorities pause before they throw it away.

A pattern of the kind of non-Presbyterianism from Presbyterians who loved Queen's have made the University what it is. This sympathy and support would never have been given if there had not been an actual constitutional tie between the church and the University. It will soon cease to be given if all connection with the church is severed. It is futile to argue that Presbyterians will have as much interest in the University, even though all formal connection be removed. There is nothing in all history to support such a contention.

My chief object, however, in writing is to point out that if steps are taken at this Assembly to make an irrevocable separation between the University and the church there will be a feeling of universal regret over the whole church. British Columbia might be expected to be indifferent in the matter. I have taken the trouble to find out what the feeling is all over the Synod, and it is well summed up in the words of one minister, not a Queen's graduate himself, who when asked his opinion as to the separation, said, "I deplore the whole proceeding." Surely a feeling of that kind is not a thing to be ignored by either Assembly or trustees.

Most of us in this Synod will be too far away to give our votes in the Assembly, but this letter is a small effort to give a little of our influence. There is something deep down in us that rebels at the thought of Queen's being lost to the Presbyterian Church in Canada.

Logie Macdonnell.

TIMES PATTERNS.

GIRL'S BLOUSE DRESS.

No. 8458.—For school or every day wear, a blouse dress is always becoming and comfortable. The design here portrayed is made with a round collar and broad tucks over the waist front. The skirt is straight and gathered. Plaid gingham with broad trimming may be used. The pattern is cut in 4 sizes, 6, 8, 10, 12 years. It requires 3 yards of 36-inch materials for the 6-year size.

A pattern of this illustration will be mailed to any address upon the receipt of 10 cents in stamps or silver.

Address, "Pattern Department,"
Times Office, Hamilton.

It will take several days before
you can get pattern.

A SHOWER OF NAILS

Were Rained on Passing Street
Car in Philadelphia.

Philadelphia, Pa., June 1.—The first ordinary business day since the beginning of the street carmen's strike here last Saturday morning closed with conditions practically unchanged. The traction company notified its men that those who had been discharged for striking on Saturday would be taken back if they reported for work at once. Men who had been discharged for trifling offences in the past were also welcomed back. With these men and recruits hired in other cities the company was able to run 700 of its 3,300 cars until midnight, when no further attempt was made to continue the traffic until tomorrow morning.

The first disturbance in the central part of the city occurred to-day when men employed in erecting a high building at Chestnut and Thirteenth streets showered nails and other missiles on a passing car.

Mr. Alfred Deakin is forming a new Australian Government.

MEDICAL MEN.

Even Japan is Ahead of Toronto in
Vaccination.

Meeting of the Ontario Medical
Association.

Toronto, June 2.—That the spread of consumption and hyphoid fever could be materially lessened if there was medical inspection and instruction in the schools, was the statement made yesterday by Dr. H. J. Hamilton, of Toronto, in his opening address as president of the Ontario Medical Association. "Educate the people by starting with the rising generation" was his message.

The 29th annual convention of the association opened in the Medical Building of the University of Toronto yesterday morning, with 200 medical men in attendance from Toronto, London, Hamilton, Montreal, Ottawa, Buffalo, Detroit, New York, Winnipeg, and other cities, many of them renowned experts in their own particular line of medicine or surgery. The convention will last three days, and the annual dinner will be held at McConkey's this evening. Tomorrow afternoon Dr. William Osler, of Oxford University, will give an address on medicine. The president's address was full of valuable information and suggestions. The profession should make honest efforts to educate the public, he said. Vaccination was so firmly believed in that he was most ashamed to mention the subject. In Japan, he said, vaccination was compulsory in the schools, consequently there was very little smallpox. Japan also had medical inspection in the schools. "At the present time compulsory vaccination is a dead letter in Toronto," said Dr. Hamilton. "I venture to say that not a solitary member of the Board of Education in Toronto would hesitate to take the Pasteur treatment if bitten by a mad dog, not even for appealing to public opinion, yet they decline to enforce vaccination in the Public Schools."

Referring to smallpox, which he referred to as a vile, loathsome, disease, and extremely contagious, he said that the disease was killing thousands who would not be vaccinated and could not have their children vaccinated, because it might mean votes against them on the first of January. "The health of the public is allowed to be made a political football," he said.

"In tuberculosis," he said, "the laity is now the faithful ally of the profession. Municipalities must supplement that." Rapid advances had been made, he concluded, by the aid of pure air, pure food and pure water. Mr. John Ross Robertson received a compliment for the work he had done in connection with the establishment of a pure milk supply in Toronto, and the Hamilton authorities also received great praise for their efforts along the same line.

WANT THE BOOKS.

George Baglin Must Spend Time in
the Tombs.

New York, June 1.—George Baglin, Vice-President of the United Copper Company, was taken to the Tombs Prison to-day, and must remain there, under an order of Judge Lacombe, of the United States District Court, until the missing books of the company, which contain the evidence upon which the Federal District Attorney seeks to convict P. Augustus Heinze, are produced. A similar punishment also hangs over Sanford Robinson, a prominent director of the company, whose case will be further considered by Judge Lacombe to-morrow.

"Nothing remains for me to do but to commit you for contempt," said Judge Lacombe, after hearing Baglin's admission. "You had no right to stand idly by while men were plotting the removal of books wanted in a Grand Jury investigation. An officer or an employee cannot so act with impunity."

STILL SLAVES.

U. S. Negroes Are Plundered, Robbed, Murdered With Impunity.

New York, June 1.—Strict application of constitutional rights as guaranteed under the fourteenth amendment, equal educational opportunities and the right to the ballot on the same terms with other citizens in every State in the Union were among the more important recommendations embodied in the platform adopted at the closing session of the National Negro Conference here to-night.

The platform adopted says in part: "We denounce the principle and ever-growing oppression of our 10,000,000 colored fellow-citizens as the greatest menace of their just share of the public funds, robbed of all parts in the government, often murdered with impunity, and invariably treated with open contempt by the highest officials, in some States they are held in practical slavery to the white community. The systematic persecution of law-abiding citizens, and their disenfranchisement because of the race alone, is a social crime that will ultimately drag down to an infamous end any community that allows it to be practised, bearing most heavily of all on the poor, white farmers and laborers, whose economic position is most similar to that of the persecuted race."

Frank Davis, aged about forty, an Englishman, out since last fall, was accidentally drowned last night in the Sydney River, Queensland. Davis and three others were in a boat when it overturned. Davis could not swim. His body was recovered shortly afterwards.

ARREST MOTORMAN.

Tried to Run Cars Through Military
Ranks at Winnipeg.

Winnipeg, June 1.—For some time past there has been friction between the street railway motormen and others, who, not realizing the privileges of the military, persist in contesting the right of way. This evening matters were brought to a head when the Ninetieth were marching from the Drill Hall to the university grounds, Broadway car No. 300 refused to stop.

Seeing the carman's intention Capt. Blanchard, of A Company, signalled the car to stop, and himself stood between the rails as the company marched across. The motorman obstinately held on until Capt. Blanchard stepped on and tripped the fender before stopping the car. Colonel Billman ordered the arrest of the car's crew, which the soldiers cheerfully effected.

The motorman was inclined to resist, but was soon convinced of the folly of such a proceeding and submitted. The regiment then continued to the grounds. After manoeuvring and a march out the men were dismissed and the motorman marched to the police station by a corporal and guard.

GRANDPA'S GRAVE.

Little St. Louis Girl Stole Flowers
From Florist.

New York, June 1.—A despatch to the Herald from St. Louis, Mo., says: Fearing that her grandfather's grave would not be decorated because he was a Confederate soldier, Mary Clipper, nine years old, went to a florist's shop to-day and procured a large box of flowers, representing that she had been sent by another florist.

She then went to the cemetery at Jefferson Park, where a sunken grave and a small marble slab marked the burial spot of the Confederate veteran, who died four years ago, tenderly placed the wreath upon the stone, kissed the flowers and returned to the city, going directly to the florist's shop, where she made a confession.

When she was arrested and held at the house of detention she expressed only joy that the grave of her grandfather had been decorated.

SKIN ERUPTIONS
AND PIMPLES

Disappear Under a Treatment With
Dr. Williams' Pink Pills.

There can be health and vigor only when the blood is rich and red. There are thousands of young men just approaching manhood who need the rich, red blood that only Dr. Williams' Pink Pills can make. They have no energy, tire out at the least exertion and who feel by the time they have done their day's work, as though they day was a week long. In some cases there is a further sign of danger in the pimples and disfiguring eruptions which break out on the face. These are certain signs that blood is out of order, and that a complete breakdown may result. In this emergency Dr. Williams' Pink Pills is the medicine these young men should take. These pills actually make rich, red blood. They clear the skin of pimples and eruptions and bring health, strength and energy.

Here is the experience of Adolphe Roland, of St. Jerome, Que., a young man 19 years of age, who says: "For more than a year I suffered from general weakness, and I gradually grew so weak that I was forced to abandon my work as a clerk. My appetite failed me. I had occasional violent headaches and began to suffer from indigestion. I was failing so rapidly that I began to fear that consumption was fastening itself upon me. Our family doctor treated me, but I did not gain under his care. I was in a very discouraged state when a friend from Montreal came to see me. He strongly advised me to try Dr. Williams' Pink Pills. I did so and inside of three weeks I began to feel better, my appetite began to improve and I seemed to have a feeling of new courage."

I continued the pills till I had taken ten boxes and I am now enjoying the best health I ever had. My cure surprised many of my friends who began to regard me as incurable, and I strongly advise other young men who are weak to follow my example and give Dr. Williams' Pink Pills a fair trial." Bad blood is the cause of all common diseases like anaemia, headaches, neuralgia, rheumatism, sciatica, indigestion, all nervous troubles, general weakness and the special ailments that only women folk know. Dr. Williams' Pink Pills are the one cure, because they go right to the root of the trouble in the blood. They change the bad blood into good blood, and thus bring health, strength and energy. You can get these pills from any medicine dealer, or by mail at 50c a box, or six boxes for \$2.50 from the Dr. Williams' Medicine Co., Brockville, Ont.

GIVE FLOWERS.

To the Editor of the Times:
Sir,—Last year many friends in the city were kind enough to remember the Young Women's Christian Association by sending flowers to this institution. I just thought I would write and mention how much these were appreciated, and to add that the lilacs, roses and other flowers are coming into bloom now. What better disposition could some people make than to favor the young ladies of the Young Women's Christian Association with a constant supply of cut flowers? May this suggestion be accepted by those who have these beauties of nature, and may they give generously. Thanking you for your kindness in giving this publicity, I am, yours truly,
Frederick W. Watkins,
Member of the Advisory Board of the Y. W. C. A.
49 Federal Life Building, Hamilton,
Ont., June 1, 1909.

KNOX COLLEGE.

Governors Discuss Resignation of
Dr. Kennedy.

Toronto, June 2.—The retiring Board of Governors of Knox College at their meeting yesterday afternoon decided to ask the General Assembly of the Presbyterian Church to give authority to the new senate and board to select and appoint another professor to succeed Rev. Dr. Kennedy as Professor of New Testament Theology. While one name was mentioned in connection with this appointment, no recommendation will be made to the Assembly by the present board, which ceases to exist as a board to-day. The new board to be appointed by the assembly will meet on the earliest possible date for this purpose.

The board acquiesced in and agreed

to pass on to the Assembly the resignation of Dr. Kennedy, who has been called to a professorship in New College, Edinburgh. A resolution was passed expressing regret at the loss of Dr. Kennedy.

It was decided by the board to ask the Assembly to appoint ex-Principal Dr. William McLaren, Principal emeritus of Knox College. A resolution of sympathy was also passed, to be sent to the widow of the late Dr. Gregg.

Principal Gandier presented the annual report of Knox College, showing that satisfactory progress was being made, and that the outlook for the future was very bright, as there were from 80 to 100 students now in University College who were looking forward to entering Knox College on their graduation in arts. Sir William Mortimer Clark and Principal Gandier were appointed to present the report to the Assembly.

The mutual friend of an engaged couple has a hard row to hoe.

THREE STATIONS.

Agriculture Experimental Farms
For Western Canada.

(Special Despatch to the Times.)
Ottawa, Ont., June 1.—Three new agricultural experimental stations are to be located in Western Canada this summer, and G. F. O'Halloran, Deputy Minister of Agriculture, leaves Ottawa to-day for the purpose of locating them. It was announced by the Minister of Agriculture last session that one of these stations would be located in Northern Alberta or British Columbia; one in the fruit district of British Columbia, and one on Vancouver Island. Mr. O'Halloran will be accompanied by Duncan Anderson, an expert of the department, and will be joined in the west by Dr. Saunders, Superintendent of experimental farms.
