The minister of agriculture should be a farmer, and Nelson Monteith, though not a second John Dryden, will probably fill the bill better than any man on his own side of the House. Mr. J. W. St. John, the Toronto lawyer, has been assigned by rumor to the agricultural department, perhaps on ac count of his familiarity with the Humber piggery; but the agricultural interests are too important to be trifled with. Our slate excludes Gamey and Nesbitt, because we give Mr. Whitney credit for making some endeavor to years we would also think it was time redeem his purity pledges. as one man found things frigid, an other felt within him a long-los sense of comfortable warmth. Up on the Hill there had been through the afternoon an air funereal. The Speaker sat himself upon the chair at 3 to gaze over the empty eats of nearly eighty stout Ontario electors. Mr. Foster was there, and Sproule. Across from them were Sir William Mulock, the customs, minister, and Hon. Napoleon Belourt. The ministers had votes in Ottawa. The Speaker had not, Foster had not, and Dr. Sproule had not. Thus were three ballots lost to the cause in

Ontario. The death-chamber feeling was in the House. In keeping with it were the mournful tones of Mr. Monk complaining at great length of long delay in the erection of permanent sheds for the harbor of Montreal. In keeping also were the Jacques Cartier member's borrowings from he Ontario stock of campaign adjectives. "Cunning as the serpent," were certain Liberals, 'machiarellic" were their deeds.

Mr. Monk, with courtesy, belittled the suggestion that harbor works in his constituency had been delayed to do him harm, but he asked for returns on the subject, and the House said he could have them, and Robert Bickerdike. one of the harbor board, said that everything was lovely, that Montreal would be the Liverpool of

Canada. And all the time the members lis tened for the distant roar of battle, Sir William Mulock shut out the thought of Widdifield and Mulock' Corners by reading from the estimates divers long lists of names. He gave nis salary increases in detail, and the House sat on in patience while ever up to the iron fences of the Hill the tide of battle rolled.

At 6 the bell rang and the members hustled forth, They went down the corridor to the telegraph offices and saw the beginning. Then they got their coats and hats and went forth into the midst of the big snow from Manitoulin Island. Sir William Mulock went home, and here received the tidings from North
