## REBUKE FROM THE WRONG QUARTER.

(From the Boston Herald.) While it has been our opinion all along that the influence of the United States in Hawaii, as exercised by President Harrison and the American representative at Hono-lulu, was a deplorable instance of interference, and while we think that the Hawaiian people have good reason to assert that the American assertion that all men are free and equal is merely a sentimental utterance which we do not believe in and which we do not propose to have control our actions, it seems to us that it hardly lies in the mouth of the English newspapers to find fault with us on this ground. The London Telegraph asserts that "the spectacle is a sorry one for Christian morality, and is a bitter for Christian morality, and is a bitter lesson of what feeble races may expect when the interests of civilized powers come into collision." But it would be well if our London contemporary would permit itself, when indulging in this train of moralizing, to reflect upon the number of times watchman to deal with if they disturbed that its government has set these precepts that its government has set these precepts him. He called upon Lowe is at defiance. If there is one nation on the face of the earth that in America, Asia and Africa has deliberately trodden down native races for the purpose of advancing its own races for the purpose of advancing its own interests, that nation is Great Britain.

The samed was a nuclear which he left much earlier than usual, he went straight to the Montreal cotton mill. There he knew his friends were working. That morning Mr. George W. Snannon, the express agent, had delivered the money which was used to pay off the hands. It was about \$13,000.

There was at the time a light in the big office on the main floor, and four men were making up the pay. These were John Lowe, the paymaster; John Loy and Hugh Wilson, clerks, and Let cenf, a brother of well and allowed him to get behind the big counter. He chatted with them and partook with them of some oranges they had. He is very fond of fruit and sweets, and "Old Belleville Boys" Telegraph other thing he was exceedingly fond of was firearms, especially revolvers, and on that account, it was not considered in the least a strange that he should ask Lowe to let him see his five-shooter. Lowe, however, well knew how careless Shortis was in handling and things and insisted

cartridge. 1t was a thirty-two calibre. gratulating the Premier on the honors that weapon. He afterwards returned it, when Shortis kept on talking as he cleaned th have come to him after his long service in Lowe reloaded it and put it back in its servative party of Canada. No fewer than again, but his request was refused. It was six of the members of the Dominion Cabinet were thinking of going home. Lowe went in the vault and as he turned the bolt, he tors, members of the House of Commons, saw Shortis again reaching for his revolver and men of prominence in all walks of life took it notwithstanding. For a moment he handled it, and then a shot rang out, and Wilson dropped.

Lowe rushed to his aid and held him up

and Loy, thinking it was an accident, ran the bullet entering his brain. The tele to victory."

The above telegram was signed by as many of the Believillians as were readily available yesterday, and was forwarded last but the bullet missed the man it was inended for and presumably struck Wilson Lowe now realized the terrible danger, both W. Northoott and his brother J. Northoott, William Powell, W. J. Taylor, Thomas Brownlee, A. S. Potts, Samuel Post, and a number of others. entrusted to his care. The murderer, for fear of being surprised by outside aid, rushed to the telephone box and tore down the receiver, destroying at the same time the

Poor Loy was lying dead at his feet. dead man had not even had a chance for his life, though he had a loaded revolver in his pocket. Shortis never gave a look at the porpse. In the meantime, Lebouf, Maxim's prother, had rushed into the vault, trying phone, than he turned again to Lowe and told him that if he moved, he would shoot him. Lowe, however, decided to take a desperate chance. With one sweep he gathered in the money, and rushed into the vault, pulling the door after him. This enraged Shortis very much, and he raved and stormed up and down and made all sorts of him. He called upon Lowe in the name of

races for the purpose of advancing its own interests, that nation is Great Britain. We have sinned in the case of Hawaii—that is, we have aided and abetted in the extinction of the political rights of the native people—but it is almost our only offence, if the American Indians are taken out of the count. With England, on the other hand, these offences are to be numbered by the score, and hence it is a little bit verging on the insufferable to have cen sure of this particular sort come to us from that source.

UMATILLA INDIANS.

When he was superseded he asked and obtained to find the public to the mill, to of his companions, of whose fates he was not aware. He pluckily crawled from his hiding place through the office into the place. Everything was quiet in the building that night. The immense weaving that night. The immense weaving the shortest way to the engine-room, where he expected to find help, but dragged himalif along the opposite side. When he had

> The murderer, having dispatched Lebouf to his own satisfaction, now began to hund for Wilson. He finally found him in his hiding place. The poor fellow was apparently dead, but Shortis wanted to make sure. He lit several matches in the attempts he again made to shoot Wilson. They gave some light, but it was not sufficient and he deliberately went for a lantern with which to finish his work. He returned, shot Wilson again and then left him. The terrible agony poor plucky Hugh Wilson must have the watchman. Shortis came in with his walking stick in his hand. They knew him well and allowed him to get behind the big want you to come out and help me carry him away.

"Where is Loy," Lowe asked. "He has gone out," Shortis retorted, "to But Lowe was not to be caught. He would not give the combination, and the murderer's entreaties were kept up at in-

Notwithstanding what he had gone through, Hugh Wilson had still some life and a great deal of courage left. He crawled along through the weaving room, and as Lord Hampden points out, is of no ad-crawled again till he reached the bottom of vantage to the man who, having no employ the fire room stairs and then he fainted once more. It was there he was found by Mr.

Begin, who had just set the machines in motion and was afraid Wilson had been H. Biddell, of Ipswich, sketched this piohurt by the wheels. He rushed out to get ture of the condition of British agriculture When they returned the brave boy regained consciousness and told his tale decided to investigate, and being warned by Wilson of the desperate character of the murderer, armed themselves with the first iron tools that came handy and went to the collection of the collection of the poorer farms fields were left to produce such herbage as, and the poorer of the poorer farms fields were left to produce such herbage as, and the poorer of the plant or in the poorer farms fields were left to produce such herbage as, and the poorer farms fields were left to produce such herbage as, and the plant or in the plant or in

out, Shortis, addressing them, oried, 100

gave. Additional aid was hastily sent for and Wilson carefully removed. Shortis was searched and the revolver and a chisel were searched and the revolver and a chisel were found on his person. How many shots he fired is hard to tell. Certainly, more than a score, perhaps two score. Lowe's cartridges had nearly all disappeared, and some of those found in the bodies of the dead and wounded were proven by the calibre to have come from the murderer's own apply the only other this who revolver. About the only other thing he said was, when he was being searched, to the effect that he much objected to having his shirt cut in the search for his weapons. But his objection availed him but little. He was finally turned over to the chief of po-

having ruthlessly sent two as good, upright, lovable men as ever lived into eternity.

With the dawn came the public anouncement of the awful deed. It went from house to house like wildfire. People could not be lieve their ears till they were convinced that the news was only too true. Threats of lynching were openly expressed and they grew londer as the day were on. There was no one to take the lead, however. Had there been, nothing could have saved Shortis. Late in the afternoon he was conducted to the mill with the jury, to view the

bodies. He had nothing to say. At times he manages to look exceedingly sleepy and he did so when he was brought face to face with the bodies. "Open your eyes well and look," he was told; and in a matter-of fact way he replied : "Oh, my eyes are open all right." Afterwards, in the office of the all right." Afterwards, in the office of the mill, he was permitted to send a message to his friend, Mr. George Bury, of Montreal. Later on he received a reply to the effect that the latter had cabled to his parents. Shortis is their only son.

Cooliy Calculated subsequent dark deeds were done only the marker of the surroundings he cried as ever, of his last victim's death, Shortis beat soon as he noticed it: "Hello, are you out his brains with the telephone receiver and then tying a piece of suspender about one of the wrists of the corpse dragged it to the bottom of the first stairs outside of the Chief of Police will let me out into the corpse dragged it to office, which leads to the beatment. ridor and give you a chance to sketch me

### THE LIBERAL POLICY. (From the Montreal Gazette.)

Liberal speakers throughout the country continue to prate to the people about the advantages of British free trade and cheap commodities. The experience of the mother land is hardly calculated to induce Canadians to copy her fiscal system. More than three million acres of land have been thrown out of cultivation in Britain by the policy of free imports, and dire distress has fallen upon the agricultural interest. Since 1889, her foreign trade has suffered a decline of £60,000,000, and the industries of snap furnishing exactly the exercise necthe land are in a state of serious depression Under free trade, the average price of wheat in Great Britain has fallen in from 55s. 9d. per quarter to 22s. 10d. per quarter, or by 60 per cent., a reduction relatively greater than has occurred in Canada. Addressing the Farmers' agony poor plucky Hugh Wilson must have suffered can best be imagined. Shortis now club, in London, on February 4th, in London, on February 4th, in London, on February 4th, in London, on Sutton stated that "the situation was worse than figures or statistics indicated, and the control of the state of the in every direction they were confronted with the magnitude of the present depres sion," and he added that unless war or great discovery of gold ensued he saw no prospect of any change for the better in English farming. Lord Hampden, writing to the London Times on February 9, pro-tested against the doctrine which Canadian Liberals have made their shibboleth, namely, that the cheapness of commodities is in itself an infinite blessing to the great mass of people, irrespective of the question whether the price of such commodities is below the cost of production. Cheapness vantage to the man who, having no employment, has nothing wherewith to buy the

under a system of free trade:

"At the present time there was want of blood to the horror-stricken men. They work, or, rather want of money to pay for seek Shortis. When they reached the office deer they stood one at each side of it and looked in. Shortis saw them and knew the to the veteran statesman did not distance forbid, and instead they have joined in a congratulatory message, which was sent for ward last night, as follows:

Thomas Ritchie, President Belleville Board of Trude, Belleville Board of the mill, released Lowe and below at the cultivated land the deteriorated; on the cultivated land the deterioration in fertility and cleanliness amounted to from £3 to £4 an acre, or 2½ millions sterling in the country of Suffolk. There was greatly full. When the shirs at both top and bottom are drawn around the country of Suffolk. There was great fifty of the mill, released Lowe and below in the cultivated land the deteriorated; on the cultivated land the deteriorated; on the cultivated land the deterioration in fertility and cleanliness amounted to from £3 to £4 an acre, or 2½ millions sterling in the country of Suffolk. There was great fifty of the mill, released Lowe and below in the cultivated land the deteriorated; on the cultivated land the deterioration in fertility and cleanliness amounted to from £3 to £4 an acre, or 2½ millions sterility and cleanliness amounted to from £3 to £4 an acre, or 2½ millions sterility and cleanliness amounted to from £3 to £4 an acre, or 2½ millions to £4 an acre, or of cultivation was getting worse every year;

a very serious crash in the agricultural in-Mr. Treadwell, a large tenant farmer of Aylesbury, gave similar testimony before the royal commission. a serious was the present state of affairs that he thought that unless there was an improvement in prices many arable farmers would be ruined in two years, and the mixed land farmers would be forced to retire. Farmers could not go on losing for ever. B:itish farmer could not compete with the low cost of pro-duction in foreign countries. Speaking in the British House of Commons last month, Right Hon. Mr. Chaplin declared that the government must either do something to lice.

In the gloomy, vault-like rooms of the cotton mill lay the bodies of the murdered vice industry in the country; and Mr.

tims, stark and rigid in death, in pools of half-clotted blood; in the narrow cell of the local prison slept the prisoner, calm and childlike and undisturbed, as if he were resting from an honest day's toil, instead of advocate as the London Times, in its issue advocate as the London Times, in its issue of 8th proximo, said that the unemployed of Great Britain are far more numerous, especially in the large towns, than they ought to be if the community were economically in a healthy state, and that the depressed condition of agriculture is not, unfortunately, a temporary phase likely to disappear with some recovery

appear with some movement of trade.

Now, this distressful state of British agrioulture is confessedly the consequence of oulture is confessedly the consequence of the policy of free imports, the like of which the Liberal party proposes to apply to Can-ada. The English farmer has been brought to ruin by the bounty fed products of the cheap labor of Europe, South America, India and Australia, The Canadian farmer is invited support Liberal candidates in the approaching elections because the establishment, through government aid, of steamship connection between the Dominion and Australasia may snable the cheap meats and dairy products of the latter colonies to enter Canada in competition with our home commodities. But, if the former has reason to dread the consequence and steamship connection, how yearly greater and the establishment. Shortis is their only son.

At the inquest the prisoner was the most remarkable feature of the affair. A cooler, more unconcerned man never faced so helinous a charge. He was brought in between two constables, his wriste handouffed together behind his back. They came with the prisoner at a shuffling gath. His long blonde hair was straggling over his forehead from under his hat, his steel blue eyes had a sleepy expression; his lip stuck out in a sort of a pout, and, on the whole, he was a miserable object to look at. When he first entered the room he seemed someth, what nervous. He trembled a little as he stood up and heaved several sighs, but these were about the only signs of emotion he gave. In the early part of the sealing seesion he was asked if he had anything to say. He thought for a while and then said in a serve of the second part of the sevening seesion he was asked if he had anything to say.

Catarrh Eclieved in 10 to 60 Minutes.— One short puff of the breath through the blower supplied with each bottle of Dr. Agnew a Catarrhal Powder, diffuses this Powder over the surface of the nasal passages. THE PIANIST'S FINGERS.

low to Properly Strengthen Them and A writer in the London Lancet gave not long ago a detailed account of gymnastic training for the strengthening of the fingers, his theory being that the weakness of the ring or third finger is not a mechanical defect to begin with, but a physiological one—that is to say, that it is not due to the connection of the extensor tendon with that of the little finger, and sometimes also middle finger, but to want of development of the muscles acting upon the ring finger through want of use in early life, so that it thus falls a long way behind the other fingers, not excepting the little finger, in strength. The editor of The Etude, in criti-

cism of the foregoing, says: Every device which works from the outside inward is of more than questionable worth. No exercise should be worked at long enough to produce much if any fatigue, for when carried to the point where the members ache it may be taken as a sign from nature that harm is being done, a warning to desist until the parts can recuperate by a rest more or less protracted. A far better form of strengthening the weak fingers is to practice the Mason two finger exercise, that demands an accent on the second tone of the motive with a snapped under finger, the quick essary to develop strength, and with the increasing strength will come on, as much to be desired, improved flexibility.

For gaining a wider expansion nothing is so good as playing the arpeggio of the Diminished Seventh for one octave, holding each key down as long as possible until the finger is wanted to strike its key again, playing both up and down. It greatly increases the value of this exercise to change the notes as given in the XV changes by Mason in the volume devoted to arpeggio playing, volume 3. A very little gain of expansiveness in the hand largely increases the ease with which chords and octaves can be clearly played. It is like a fan. The fraction of movement at the joint is multiplied at the extremity. Whatever the hand gains from the exercise of its own muscles by direct act of its inner nerves, muscles and tendons is a gain of value, but when outside appliances are used the hand is as liable to get harm as permanent good from their

Dressing a Flowerpot.

Here is a new wrinkle in decorations from American Gardening: enough to allow for both cut edges to be and bottom can be made wide or narrow to suit the taste of the maker. Of course the toilet of the plant, trimmed and watered, should be made before the silk cover is put on.

# Lace Ruches and Collars.

It is safe to wager a vast amount that there exists not a lady's wardrobe in the whole United States that is not enriched by a lace frippery or two. Fashion insists upon the addition of lace and chiffon to every house costume; consequently one sees all sorts of delightful contrivances for decorating the neck. The collar, the fichu, the ruffle, are all to be found under the most delightful aspects. There are indeed dainty trifles,

A NEW LACE COLLAR.

joices infinitely, and, by the way, the maiden who is unfortunately the victim of a bony neck may be cordially advised to adopt one of the new chiffon ruches to be worn with evening dress. It absorbs a vast amout of chiffon, and can be had in pink or blue or white or black or indeed any color. Occa-sionally the soft chiffon is interspersed with rosettes of colored velvet, and then again they are to be found quite simple and decorated at the back with a bow. The new lace collar, with full shoulders, is not only useful in transforming

a low bodice into a high one, but in making dressy the plainest of high waists. Housekeeping Brevities.

No breakfast at this season is com plete without some kind of griddle cakes. There is a fad for Chinese dishes among them rice, citron and raisins

boiled together. It will be well to boil the molasses se used for gingerbread, or at least heat t very hot, before beating up the cake, and it will be greatly improved.

Before laying a carpet wash the floor with turpentine to prevent buffalo bugs. One of the gastronomic conundrums why buckwheat cakes and sausages go together.

Heat the knife before cutting warm read or cake. Brighten tinware with a damp cloth

nd soda. In a north room yellow shades are in-dispensable. They impart an effect of glowing sunshine that is as cheerful if not as warming as the real article.

Heart Disease Relieved in 30 Minutes.— All cases of organic or sympathetic heart disease relieved in 30 minutes and quickly one dose convinces. Sold in Victoria by D. E. Campbell. not as warming as the real article.
