

THE CHILDREN OF FRUIT

How to Keep Them Well

Living active child the cells of the body are composed of—out—and replaced—very this dead tissue must be of somehow, and the dan- of the eliminating organs— kidneys and skin—may work well enough. Then becomes poisoned and the not thrive.

has such an invigorating these organs as ripe fruit juice increases the ac- kidneys; other fruit juices the liver to secrete more produces easy and regu- of the bowels; others glands of the skin to throw waste matter.

It is that to get these great deal of fruit must be the excess of pulp and the may upset the digestion. way is to give the children "Fruit-a-tives" which are concentrated fruit juices with points added.

"Fruit-a-tives" have the combined the different fruit juices, the eliminating organs to perily, curing constipation, the system, and keeping the lump and rosy. 25c for a 50c for regular size—\$2.50. Fruit-a-tives Limited.

JUDGE COMMENDS DISPLAY OTHER VESSELS TO EQUIP

Standards for 1910 Outlined
For Benefit of Local
Fanciers
When Test is Made of Appar-
atus Other Steamers Will
Be Supplied

(From Saturday's Daily)

The poultry show, which has been in progress since Tuesday at the Market building, closed last night. There was not a large attendance, most of the comparatively small assemblage grouped about W. C. Denny, the New York judge, as he went from pen to pen completing the work of distributing prizes, explaining as he went the points of superiority of one bird over another of the same class. In the evening he answered a number of questions and delivered a short lecture. That Victoria's exhibition was better, generally speaking, than those that have taken place throughout the northwest this year is the opinion of Judge Denny. While he hands out this flattering bouquet, he makes some important qualifications. In many of the varieties he affirms that the fanciers do not know the standard and which they should strive to attain. This is especially so in respect to the "reds." For that reason the scoring has been low in many instances.

Judging Efficient.
President Baylis declared yesterday that never in the history of the local association had the judging been more efficient. Mr. Denny had gone over every class most carefully and, although he had marked many birds low, that were thought to be well up to the model, the fanciers would not be dissatisfied because, in doing so, he had detailed his reasons. As a result the president expressed the belief that the outcome would be beneficial. The breeders now would have something definite in view and would guide themselves accordingly.

Mr. Denny, it was asserted by the president Baylis, was one of the nine of the highest qualified judges on the continent. He had been among the few selected by the American Association to outline the 1910 standards to fanciers throughout the States and Canada.

Popr Attendances.
The poor patronage the show had received at the hands of the public was commented on by the president. He said that, if the importance of the show was properly appreciated, it would attract a larger daily attendance. In Seattle the gate receipts had amounted to about \$15,000, while here it was doubtful if more than \$200. There was no reason for this and it was a view of the fact that the local exhibitors always was equal and sometimes better to that on the other side of the line. The association's income, including provincial and civic grants, would reach approximately \$500 and when it was remembered that out of this amount had to be paid the salaries of the judge, of attendants as well as prizes, it could easily be appreciated that the cramping economy was essential.

Room for Development.
The industry on which the poultry show was based, and to which the latter was an authoritative index, President Baylis contended was one of the most important in British Columbia. He claimed that there was room for tremendous development. Some years ago two or three cases of eggs sold in the west were imported. Since then that had been reversed. Now two cases came from local ranches to the market and were sold outside. Still \$600,000 worth of eggs were imported. And the president contended that the time had come for another \$400,000 worth per annum in the north. Thus it was possible for British Columbians to find a market for \$1,000,000 more eggs than at present. To encourage the movement was one of the aims of the local poultry association. Therefore from a commercial standpoint alone, it was in the interests of the citizens to support the show.

BILL MINER'S ESCAPE

Former Deputy Warden Bourke of the Penitentiary Threatens to Make Revelations

New Westminster, Jan. 28.—Placed because a recent dispatch from Ottawa intimates that discipline in the B. C. penitentiary was not perfect during his tenure of office, D. D. Bourke, ex-deputy warden, and for months virtually warden, has written to the press intimating that unless justice is done him he will open up a new field for moral reformers by telling the world the truth about the escape of Bill Miner and his three convict companions, who elvanted from the B. C. penal institution in August 1897. Mr. Bourke states that the disclosures he may make publicly would be sensational and far reaching. In a subsequent interview at his home in New Westminster, former Deputy Warden Bourke said he believed that Bill Miner did not escape from jail, but was handed out. He declined to say whether or not the escape of Shorty Denny was merely a blind and part of the plot.

Intending Emigrants Warned.

London, Jan. 28.—The secretary of the British Welcome League, through the Manchester Guardian, warns intending emigrants unless they actually have work in Canada, that they should be warned of the dangers of the unemployed and starving in Canada.

Engineers' Suggestion.

Toronto, Jan. 29.—At the annual meeting yesterday of the Canadian Society of Civil Engineers, a resolution was made that the Dominion Government should be requested to establish a department of research, similar to that established in the United States government, to investigate the properties of all materials of engineering interest. Pending establishment of such a laboratory, they suggest that an arrangement be made for the use of universities, staffs and equipment for the purpose.

The good man is he who is incapable of a mean thought or action—Macdonald.

Wireless telegraphic apparatus is to be installed on the steamer Princess May in the near future. The house for the wireless station to be installed on the C.P.R. Skagway liner is now being constructed and arrangements are being made for the installation. Officials of the United Wireless have been negotiating for some time, as have other companies regarding the equipment of the steamer, but no decision has yet been reached. Investigations are being carried out by the telegraph department of the C.P.R. to ascertain which apparatus is the most suitable. It is expected the steamer will be equipped before leaving on her next trip.

The value of wireless telegraphic apparatus has been amply demonstrated during the past year, and within the past few days the sinking of the steamer Republic of the White Star line and the saving of her passengers has shown how great a factor this method of communication can be made in saving life. The stranding of the steamer Republic on Mount point Pender Island, also demonstrated how effective it was to secure assistance in case of accident, apart from the great advantage to travellers on steamers so equipped. The equipment of the steamer Princess May is to be a test to demonstrate what arrangements will be made for the equipment of the other C.P.R. steamers in the Pacific, not only the coasting steamers of the B. C. service, but also the trans-Pacific liners.

The growing use of wireless telegraphic communication will probably result in the near future of amended regulations for the control of correspondence. The Norwegian government has been obliged to place in effect regulations governing its use. One clause provides for the restriction of communication within certain hours, and for its suspension when orders are issued by the superintendent of any of the coast wireless telegraph stations. It is also provided that during the stay of a steamer equipped with apparatus in a Norwegian harbor within a distance of five miles (27-10th miles) from the nearest coast station the station on the steamer must not be employed for telegraphing to any Norwegian or foreign wireless station, ashore or afloat. Without special permission no communication must be maintained by ships in Norwegian harbors unless to avoid accidents, warships being excluded from these regulations, including provincial and civic grants, would reach approximately \$500 and when it was remembered that out of this amount had to be paid the salaries of the judge, of attendants as well as prizes, it could easily be appreciated that the cramping economy was essential.

Some complaint was made by some of the land stations here a short time ago regarding the interference of communication in consequence of the Japanese operators of incoming and outgoing N.Y.K. liners carrying on constant communication.

Winnipeg Stock Exchange.

Winnipeg, Jan. 30.—The Winnipeg stock exchange opens on Monday with sixteen members. There are 24 seats.

Embargo Raised.

Niagara Falls, N.Y., Jan. 30.—The embargo on American horses and every other animal except cattle, as the result of the prevalence of foot and mouth disease has been raised.

Great Men Who Have Proved Zam-Buk

Scientist, Analyst, Magistrate, and War Correspondent Testify.

Men and women great in point of knowledge and position and experience say that Zam-Buk stands superior to all other healing substances. Read the opinions of the following eminent men: Dr. J. C. Sanford, a School Commissioner, and Baptist Deacon, says: "Zam-Buk cured me of eczema on my ankle, which had defied every other remedy tried during twenty years. It also cured me of piles; and I take pleasure in recommending it to my fellow-men."

Mr. Frank Scudamore, the famous war correspondent, who has gone through twenty-nine battles, and whose dispatches during the Boer war were so eagerly read from coast to coast in Canada, says: "Owing to the poisonous dye from an undergarment penetrating a slight scratch, my legs broke out in ulcers. At one time I had seventeen deep holes in my left leg, into each of which I could put my thumb; and had fourteen similar ulcers on my right leg. Remedy after remedy failed to heal these, and I was well nigh worn out with pain and lack of sleep. Zam-Buk was introduced, and I am glad to say that it gave me speedy relief. A few weeks' treatment resulted in a perfect cure of all the ulcers."

Dr. Andrew Wilson, whose reputation as a scientist is world-wide, in a book recently published ("Homey Talks on First-Aid") says: "Zam-Buk may be used upon an anti-septic dressing which requires no preparation, and has the particular advantage of possessing unique healing properties."

Mr. W. Lascelles-Scott, the famous analyst to the Royal Commission for Victoria, says: "I have no hesitation in certifying the entire purity of Zam-Buk. It is of great healing power for open wounds or injuries." He also goes on in quoting authority after authority, all of the opinion, based on personal tests, that Zam-Buk should be in every household. Zam-Buk is a cure for cuts, burns, scratches, cold-sores, chapped hands, ulcers, scalds, sores, ringworm, blood-poisoning, and eczema. It is also used extensively for piles, for which it is without equal. All druggists and stores sell at 50c a box; 3 for \$1.25; or post free from Zam-Buk Co., Toronto, for price. You are warned against harmful imitations.

The time used is Pacific Standard, for the 12th meridian. The figures for height are from 9 to 24 hours, from midnight to midnight. The figures for height serve to distinguish High Water from Low Water.

The height is in feet and tenths of a foot, above the average level of the lowest Low Water in each month of the year. The level is half of foot lower than the datum to which the soundings on the admiralty chart of Victoria harbor are reduced.

CONSECRATED THIS MONTH

Rt. Rev. Bishop McDonald Celebrates His First Pontifical High Mass

Bishop Alexander McDonald, who has been placed in charge of the diocese of Vancouver Island, will, from Rome, to Rev. Father Brabant, the administrator of this diocese, under date of the 8th of this month that he arrived in Rome on the 26th of December and was consecrated Bishop of Victoria in the chapel of the Propaganda college upon January 3rd.

He celebrated his first pontifical high mass in the same chapel upon the 8th of January, the day when the festival of the Epiphany is celebrated. Upon the day following, the 9th, he had audience with the Holy Father and intended, a few days subsequent to the date of his letter, to leave Italy for Palestine, returning to Rome about the middle of February and coming out to America on his way to his city towards the latter part of March.

A. Haggart, M.P., for Winnipeg, swears he had no election expenses.

Campbell WHITE SALE Campbell

Everything Ready-to-Wear for Ladies and Children

THIS IS THE WHITEWEAR SALE you have been waiting for—the sale where the supply is unlimited, the quality unsurpassable, and the prices unmercifully slaughtered. These superfine goods are NOT the built-by-the-mile whitewear—they are the largest aggregation of REFINED, EXCLUSIVE, WHITE GARMENTS ever offered for sale in Western Canada—every garment carries the hall-marks of DAININESS, DISTINCTION and DURABILITY. It is the universal popularity of our great white sale which gives you an opportunity to make retail purchases at wholesale prices—the goods create the demand—YOU get the benefit.
