Baby Rambler Rose

THIS is the latest introduction in the Rose line. The bloom resembles the
Crimson Rambler; the bush is not a climber. It is the greatest for
rose and nearest to a *perpetual* bloomer of any rose known. When grown
in the garden it is in constant bloom from June till November.

WHERE VALUABLE—As specimen plant in lawn or garden. In
corners. As edging in driveways. Where low hedging of roses is
desired. In house for pot culture. For florists for forcing for bloom at Christmas,
Easter, or any day of the year. Everywhere, parks, cemeteries, etc.

We are the largest growers of H.P. Roses in Canada. Write for
and also one of our General Catalogues.
