

Mr. Gemmell—There is a great difference in the seasons in regard to pollen in sections. The depth of the frame would have a good deal to do with it.

Mr. Smith—Last year we had very little pollen in the sections and this year we had a great deal. I could not account for it; the foundation was as near the same as could be. I thought it must be the season or the time of putting on the supers. The supers are put on after they swarm.

Mr. Holtermann—I think there is no doubt that this season had a great deal to do with that. In our own comb honey we never had so much pollen in sections, and another man told me he had no pollen in sections, practically; I went through his comb honey and I found he had more in it too than he ever had before! A man at the Toronto Exhibition said to me, "I don't believe I have got a cell of pollen in that whole pile." The judges broke up a section and they found in that very section two cells of pollen.
