

But glass is a proverbially brittle and treacherous substance, and it is liable to break in the hands of anybody, at any moment, and without any discoverable or apparent cause, and that whether filled or not. As a consequence there must always be some risk attached to the handling of glass containers. The best that can be done, as we have suggested elsewhere, is to reduce the risk of rupture or fracture to a minimum, and this Mr. Marchand has done, not only by his safety stopper device, but also by the promised substitution of the stronger flint glass. The retail trade will, we are sure, welcome this latter change most heartily, since it completes and supplements the efforts made in the mechanical direction, and thus removes, as far as lies in human efforts, all danger arising from handling Marchand's goods.

A SCOTCH DOCTOR'S OPINION.

The Quarterly Journal of Inebriety, so well and favorably known through the instrumentality of its brilliant and philanthropic Editor T. D. Crothers, A.M., M.D., quotes the following statement in reference to pain relieving remedies from one of Great Britain's noted medical men, Dr. John Stewart Norvell, Resident Surgeon, Royal Infirmary, Edinburgh; "Antikamnia Tablets are a remedy for almost every kind of pain, particularly for headaches, neuralgias and neuroses due to irregularities of menstruation. They act with wonderful promptness, the dosage is small, two tablets. The undesirable after-effects so commonly attending the use of other coal-tar analgesics are entirely absent and they can therefore be safely put into the hands of patients, for use without the personal supervision of the physician."

SANMETTO IN ORIGINAL PACKAGE.

Sanmetto proves an admirable success whenever prescribed in the original package, thereby getting the genuine article. Sometimes I give a prescription in smaller quantities, and am disappointed in the results, thereby convincing me that a spurious article has been palmed off on my patient.

Marble Falls, Texas.
