Export Contact:

Mr. D. Birchall, President

Since being established in 1985, D & J Precision Toolworks has earned a reputation for high-quality mould making at competitive prices. Specializing in tooling for automotive, electronic and electrical parts, the company's small highly-skilled team of mould makers has the capability to design, fabricate and test compression, injection, structural foam and thermoset injection moulds, as well as to produce prototype moulds. The mould making shop contains precision machining and CAD facilities.

Product Descriptors:

Injection Moulds, Conventional Edge Gate
Injection Moulds, Hot Runner
Injection Moulds, Insulated Runner
Prototype Moulds
Structural Foam Moulds
Thermoset Injection Moulds

Areas of Product Specialization:

Automotive
Computers
Electrical
Electronics
Housewares
