Market Displays Good Tone

World Office, Thursday Evening, Nov. 11.

A better undertone was noticed al-most thruout the whole market this

forning, with advances in Gifford,

Otisse and Trethewey during the ses-

The Gifford shares have been inac

tive of late, but despatches from the Cobalt camp indicated that a strike had been made on the company's prop-

erty, and the increased demand forced quotations up four points to 24 cents during the early trading. This advance

was held thruout, tho the buying move-ment fell off in the afternoon. Closing

the round during the session.

The movement in Rochester was not very successful to-day. Considerable profit-taking was indulged in on the recent advances and prices sagged easily, the the lass was not very ma-

dea that, the the recent find on Ro-

the stockholders, it has been fully discounted, and this seems to have found Great Northern

ounted, and this seems to have found counted, and this seems to have found green - Meehan greens were not so strong as during the past few days, and, should support be dropped, a break might easily follow.

The stock recovered late in the day, closing firm at 17 3-8.

Closing firm at 17 3-8.

Compared to sell off Nipissing Nancy Helen

closing firm at 17 3-8.

Foster was also inclined to sell off and a quieter tone was apparent. The fact that prices have dropped nearly pive points in the last two days, for no apparent reason, is thought to bear out the statement that the advance was not warranted by the facts as known.

The advance in Otisse stock yester—lay was accounted for by three reamons. First, the nearness of the suit which comes before the courts next week. Second, on account of the rich strike which was made on the property a short time ago, and lastly, because of the fact that it is reported the Crown Reserve people are negotiating for the purchase of the Gavin-Hamilton and the Otisse-Curry claims, which are in close proximity to the Chisse mine.

The belief has gained much ground that in the suit which will come off next week the company will have no difficulty in winning out, and it is thought that the stock will get back to a more, normal level in relation to its value.

MARKET IS STRENGTHENING.

After carefully diagnosing the Cobalt market, we feel confident in advising purchases of most of the listed securities. Many stocks are entitled to a good recovery in price, and we will name these on request. A spotty market is likely to rule for some time, and those who are speculating should take profits on every sharp rally, replacing commitments on the subsequent decline.
