

as to prevent the land being worn out with a repetition of the same crop year after year. They should also be instructed as to building fences, manuring their lands, sowing their grain, root-crops and garden seeds properly, so as to reap the greatest possible benefit therefrom.

They should be instructed relative to the proper way of saving their crops and housing the same, threshing their grain and converting it into flour and the rates they should pay for having their flour ground, also, if they have any surplus grain, what price they should receive for
