MORE BUSHELS TO THE ACRE

If you seed with a Van Brunt Drill that will effectively seed any soil that can be seeded. Made in sizes 12, 14, 16, 18, 20, 22 and 24. We replace free all disc bearings that wear out.

The Light Draft Van Brunt Drill will help you to increase your yield per acre. Every grain is covered. The seed is deposited near the centre of the disc at the point where the furrow is wide open—not outside the disc circle, after the furrow is closed, as is found on other drills. The seed is not touched or distributed by the upward turn of the discs, but is planted at a uniform depth. Every kernel counts. The Van Brunt deposits and covers them all at an even depth.

The Light Draft Van Brunt Drill has an adjustable force feed device, which compels accurate seeding. Every feed deposits the same quantity in a continuous, even stream. It does not deposit a bunch of seed in one place and then skip a certain distance. Equipped with gear drive makes it positive and accurate, and it can be regulated without changing gears to sow any quantity from a few pounds per acre to the required number of bushels per acre. This is an exclusive Van Brunt feature; you will not find it on any other drill.

THE VAN BRUNT PRESS DRILL

Made in 14-16 and 18 sizes
with 7-in. feed, equipped with
single, double Discs or Shoes
